## PREFACE

The State Domestic Product (SDP) representing the value of goods and services produced within the geographical boundaries of the state in a particular year is one of the most important indicators measuring the economic growth of the State. The per capita income (PCI) measures the standard of living of the people and is a major constituent of Human Development Indicators.

The Directorate of Economics and Statistics estimates Gross and Net State Domestic Product and Per Capita Income at Current and Constant prices based on data from all the sectors of the state's economy.

This publication contains the estimates of Gross and Net State Domestic Product with 2004-05 as base year. Apart from the estimates of GSDP/NSDP industry wise, related ratios namely percentage shares of each sector, indices, percentage variation over previous year etc, for the years 2004-05 to 2014-15 have been presented along with a brief write up.

The district wise sectoral composition of gross and net district income for the years 2004-05 and 2012-13 at current and constant prices are also included in this publication. This publication also contains the methodology adopted to compute GSDP at State Level and Historical data as available from previous publications

The constant guidance of Central Statistical Office and co-operation extended by various State and Central Government Departments in furnishing the input data required for the estimates is sincerely acknowledged.

I endorse the efforts of Sri. K. Siddaraju, Joint Director, Sri. K.Narasimha Phani, Deputy Director and officials of State Income section of this Directorate in preparing the estimates of State & District Domestic Product of Karnataka.

It is hoped that this publication would be highly useful to policy makers, Economists, Administrators, Planners and Research Scholars. Suggestions for the improvement of this report will be gratefully appreciated.

  
(K.LAKSHMIPATHY)  
Director  
Directorate of Economics & Statistics  
Government of Karnataka, Bangalore.

# **STATE DOMESTIC PRODUCT OF KARNATAKA 2014-15**

## STATE DOMESTIC PRODUCT OF KARNATAKA - 2014-15

### State Income

The growth of GSDP at constant prices (year-on-year) slightly decreased from 7.2% in 2013-14 to 7.0% in 2014-15, mainly attributable to the decline in the growth of agriculture from 9.4% in 2013-14 to 4.5% in 2014-15. However, the growth of industry and services slightly increased from 4.2% and 8.0% in 2013-14 to 4.4% and 8.9% during 2014-15 respectively. The State economy showed reviving trends with anticipated growth rate of 6.1% in 2012-13, 7.2% in 2013-14 and 7.0% during 2014-15.

### Advance Estimates of Gross State Domestic Product (GSDP) for 2014-15

Karnataka's Gross State Domestic Product (GSDP) at constant (2004-05) prices is expected to grow at 7.0% and reach Rs. 344106 crore in 2014-15. 'Railways', 'Storage', 'Trade, Hotels and Restaurants', 'Transport by other means', 'Real Estate, Ownership of dwellings and Business Services', 'Communication', 'Public Administration' and 'Other Services' have all contributed to the growth of services sector (8.9%). Manufacturing sector is expected to grow at 3.2%. The expected growth rate of 'Electricity, Gas and Water Supply' is around 8.7%. 'Agriculture and Livestock' (4.3%) is the main contributor to the growth rate achieved in the Agriculture sector (4.5%).

### Comparison between Advance Estimates of 2014-15 and First Revised Estimates of 2013-14

A comparison of the estimates is presented by annual growth rates in **Table A**. The growth under agriculture and allied sector is expected to decrease by 4.5% in 2014-15 compared to a growth of 9.4% during 2013-14. Industry sector (comprising mining & quarrying, manufacturing, construction and electricity, gas & water supply) is estimated to increase marginally to 4.4% during 2014-15, compared to a growth of 4.2% during 2013-14. An increase in the growth rate of the service sector is evident from 8.0% in 2013-14 to 8.9% in 2014-15. Real Estate, Ownership of Dwellings and Business Services, Banking and Insurance, Public Administration and Other Services which have each grown beyond 10% are the key driver of the 7.0% growth of GSDP in 2014-15 (i.e. from Rs. 321455 crore in 2013-14 to Rs. 344106 crore in 2014-15). At the same time, per capita GSDP at constant prices is expected to increase from Rs. 52719 in 2013-14 to Rs. 55898 in 2014-15, i.e. by about 6.0%.

**Table A : Sectoral Growth Rates of GSDP at Constant (2004-05) Prices (%)**

	<b>Total GSDP</b>	<b>7.2</b>	<b>7.0</b>

A.E.: Advance Estimates, F.R.E.: First Revised Estimates

### Net State Domestic Product

The estimates of Net State Domestic Product (NSDP) are derived from the Gross State Domestic Product (GSDP) by deducting Consumption of Fixed Capital (CFC) or Depreciation. The estimated NSDP at constant (2004-05) prices is Rs. 301071 crore in 2014-15 compared to Rs. 280560 crore in 2013-14, showing a growth of 7.3% in 2014-15 against 7.4% during 2013-14. Agriculture & allied activities, industry and service sectors are expected to register a growth of 4.5%, 4.8% and 9.0% respectively in 2014-15. The NSDP at current prices is estimated at Rs. 625412 crore in 2014-15, higher by 14.5% than that achieved in 2013-14 (**Table B**). On NSDP basis too, the agriculture & allied activities, industry and service sectors are expected to register a similar growth of 17.2%, 8.5% and 16.0% respectively at current prices.

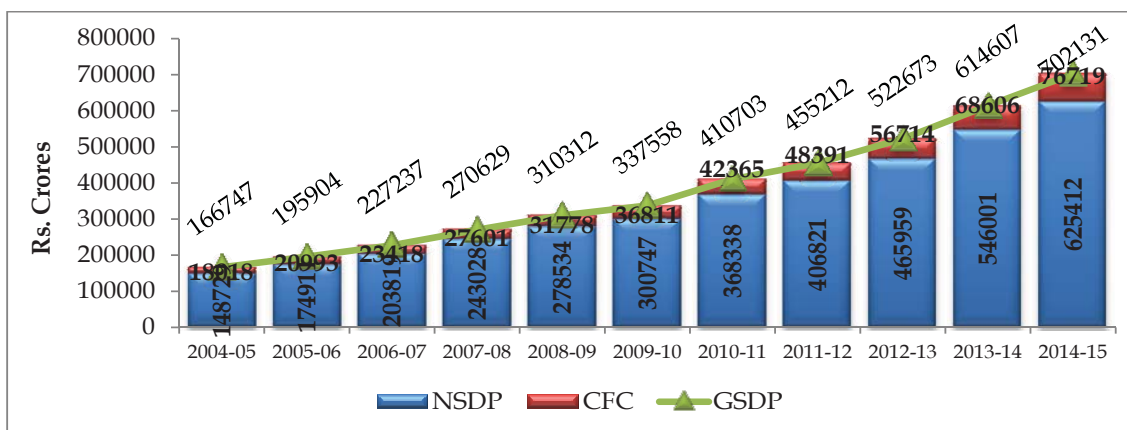

**Table B: NSDP at Current and Constant (2004-05) Prices**  
(Rs. in Crore)

Sectors	NSDP at Current Prices		NSDP at Constant (2004-05) Prices

<b>NSDP</b>	<b>546001</b>	<b>625412</b>	<b>280560</b>	<b>301071</b>

A.E.: Advance Estimates, F.R.E.: First Revised Estimates

**Figure 1** shows the GSDP, NSDP and CFC at constant (2004-05) prices from 2004-05 to 2014-15. The difference in GSDP and NSDP indicates the extent of consumption or depreciation of fixed capital.

**Figure 1: GSDP, NSDP and CFC at constant prices**

### Sectoral Composition of Gross State Domestic Product

The composition of GSDP of agriculture & allied activities and that of service sector (from 17.1% to 17.5% and 58.2% to 59.1%, respectively) saw a marginal increase in 2014-15 against 2013-14. During the last few years, services sector has been contributing as the largest component of GSDP. It is evident from the *Table C*, that industry sector saw a marginal decrease from 24.7% in 2013-14 to 23.4% in 2014-15. The composition of 'Real estate, Ownership of Dwellings and Business services' is highest with 18.9% in 2013-14 and 19.9% in 2014-15. This is followed by 'Trade, Hotels & Restaurants', 'Manufacturing' and 'Agriculture (including livestock and horticulture)'. The sectoral composition of GSDP in 2013-14 and 2014-15 at current prices is given in *Table C*. The sectoral composition of GSDP is shown in *Figure 2* by primary, secondary and tertiary sectors.

**Table C: Sectoral shares of GSDP at Current Prices**

**Figure 2: Sectoral composition of GSDP at Current Prices**

### Per Capita Income

Per capita income is estimated by dividing NSDP at current prices with mid-financial year projected population. Per Capita State Income (i.e. per capita NSDP) of Karnataka at current prices is estimated at Rs. 101594 during 2014-15, against Rs. 89545 in 2013-14, an increase of 13.5%.

On comparison, the level of per capita income at constant (2004-05) prices is expected to increase from Rs. 46012 during 2013-14 to Rs.48907 for the year 2014-15 with an increase of 6.3%.

### Growth of NSDP and Per Capita Income

**Table D** presents the growth of Net State Domestic Product and Per Capita Income of the state over the years are presented below.

**Table D: Growth of NSDP and Per Capita Income**

Year	NSDP at Current Prices (Rs.Crore)	Per Capita Income (Rs.)
1960-61	692	296
1970-71	1858	641
1980-81	5587	1520
1990-91	20551	4598

	<b>State</b>	<b>52267275</b>	<b>46595882</b>	<b>29999067</b>	<b>26125014</b>	<b>77168</b>

- These District income estimates are prepared on a provisional basis. The database for the estimation is available for primary sector only. In respect of secondary and tertiary sectors, the State level estimates are allocated to districts with appropriate available indicators at the time of preparation of estimates as per the guidelines of CSO. Because of the data limitations, it may not be very useful to analyze the sector wise district estimates between any two given points of time as the estimates are not firmed up.
- Bengaluru Urban District stood first in the total District Income as well as per capita district income for the year 2012-13. Bengaluru Urban District contributes 32.6% to GSDP at current Prices followed by Belagavi (5.4%), Dakshina Kannada (4.5%), Mysuru (4.4%). However, Yadgiri and Chamarajanagar both standing at 0.9% and last in the districts' contribution to the GSDP.
- At constant (2004-05) prices, contribution of Belagavi district to the primary sector GSDP is highest in 2012-13, due to a higher contribution in agriculture. Bangalore Urban District tops in secondary and tertiary sectors due to high concentration of major industries and infrastructure facilities.

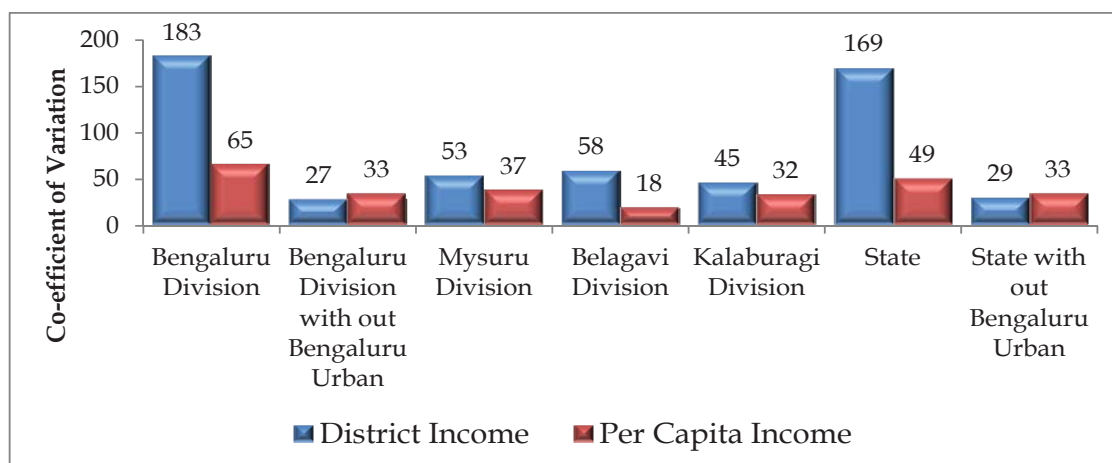

- The per capita income (in rupees) at current prices for all 30 districts for the year 2012-13 is presented in **Figure 3**.

**Figure 3 : District wise Per Capita Income (in rupees) - 2012-13**

District income is also a measure of the level and growth of economic development at the district level. It is a useful policy indicator to monitor the nature and degree of inter-district variations as well as, disparities in the process of economic growth at the State level. A simple statistical indicator of inter-district variations in the levels of district income is coefficient of variation. **Figure 4** shows these computed values across the four divisions and at the State level.

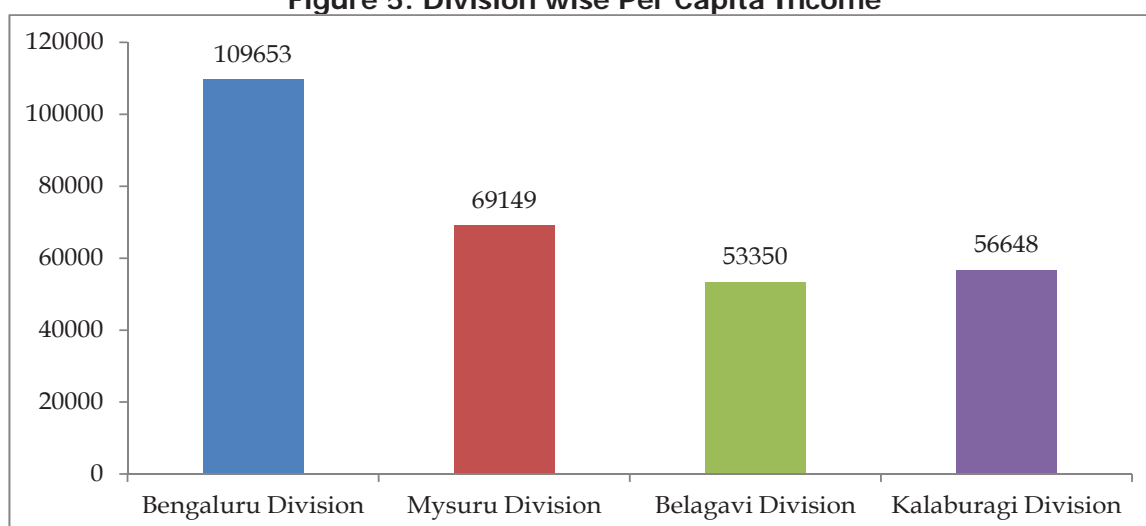

**Figure 4: Inter-district variations of Gross District Income and Per Capita Income by Divisions in Karnataka for 2012-13**

*Figure 4* indicates the variations in gross district and per capita district income among the revenue divisions of the State. The highest variation is evident with respect to Bengaluru division, if Bengaluru Urban District also included. Excluding Bengaluru Urban, inter-district variations in district income and per capita district income gets remarkably reduced at the division and State level. The growing inter-district variation is an important indicator and source of broader inter-regional disparities in the process of State's economic development. However, a low coefficient of variation as such does not necessarily imply either a higher or lower district economic growth or regional disparity.

It can be observed from *Figure 5* that Belagavi the revenue division (comprising Belagavi, Vijayapura, Bagalkote, Dharwad, Haveri, Gadag and Uttara Kannada districts), stood lowest in the per capita income. Belagavi division's per capita income is less than half of the per capita income of the Bengaluru division.

**Figure 5: Division wise Per Capita Income**

**Press Release:**

As per the direction of Central Statistical Office, Ministry of Statistics and Programme Implementation, Government of India, Directorate of Economics and Statistics, Karnataka issued a press release containing the GSDP estimates for the first time through Information

and Publicity Department. The same is also released through the departmental website. (<http://www.des.kar.nic.in>)

#### Comparable Estimates (Reconciliation of GSDP with CSO):

The Planning Commission as well as the successive Finance Commission felt that the estimates of State Domestic Product (SDP) prepared by the respective Directorates of Economics and Statistics (DES) were not strictly comparable as the procedures adopted by each States were dependent on the extent of the statistical development in each State and the nature of data available at the time of the preparation of DES estimates. As such they felt the need of preparation of a set of comparable estimates of SDP by the Central Statistical Office (CSO). As distinct from those prepared by the DESs, following uniform procedure for all the states for their use. Comparable estimates of SDP at current prices are being prepared by the CSO at the instance of Planning Commission with the consultation of State DESs on a regular basis.

The comparable estimates of SDP are reconciled by the CSO every year. The estimates of 2010-11 have been reconciled during April, 2013. During reconciliation meetings, the actual contribution of central government, boards and corporation are provided by CSO, accordingly the revisions are adopted. The details for which the information required during the reconciliation is as follows:

- Railways, Banking & Insurance and Communication Public (Supra Regional Sectors)
- Agriculture and Livestock (Value of Byproducts, Inputs cost, Seed rate, prices of meat by-products)
- Public Administration (Central and Autonomous Institutions),
- Electricity (Central and Private electricity companies)
- Biogas (No. And Value added per plant),
- Constructions (Central, Supra regional sectors, Central Plan Schemes, Plantations, Other Households and Residuals, GVO to GVA ratios),
- Mining (Salt Evaporation),
- Regd. Manufacturing (Railways, Defence, RBI currency),
- Transport (Air, Water transport and Private Shipping Companies),
- Storage (Central Warehousing and Cold Storage),
- Communication (Private organised)
- Trade, Hotel and Restaurants (Central NDCUs and Private Organised)
- Business Services (Computer related services)
- Ownership of Dwellings (Rural) and
- Other Services ( GVA from Central Govt. Hospitals in Karnataka, Radio and TV Services and Recreational, Cultural and Sporting Activities)

The reconciled estimates of GSDP at current prices for the years 2004-05 to 2011-12 are presented in **Table F** below:

**Table F: Comparison of GSDP before and after Reconciliation**

Year	GSDP Before Reconciliation (Rs.lakhs)	GSDP After Reconciliation (Rs. lakhs)	Percentage Increase / Decrease	Reconciliation held during
2004-05	16607767	16674713	0.40	Aug-10
2005-06	19469461	19590407	0.62	
2006-07	22646185	22723706	0.34	
2007-08	26862961	27062879	0.74	
2008-09	30214642	31031233	2.70	Apr-11
2009-10	34523594	33755850	-2.22	Apr-12
2010-11	40646963	41070316	1.04	Apr-13
2011-12	45889437	45521235	-0.80	Apr-14

**New Initiatives:**

The major challenge in computing GSDP estimates at state and district level is accessibility to employment data. At present, the National Sample Survey Organisation conducts quinquennial Employment and Unemployment Surveys. Inter survey growth rates are being used to extrapolate for forthcoming years.

The statistical data required for computation of Gross Value Added from registered manufacturing sector is being collected from the Annual Survey of Industries (ASI). The data collected from these surveys is sufficient to arrive at state level estimates. However these are not adequate enough to compute the estimates at district level.

Estimates of some of the more important sectors like; Gross Value Added (GVA) of computer related services, private sector construction, etc., are being calculated at the All India level and the same is being allocated to the States based on employment, prevailing in the concerned sectors.

To overcome these deficiencies, the Directorate has initiated the following measures:

- The reliable estimates for manufacturing sector at the district level can be prepared by increasing the sample size significantly by participating in the residual survey of ASI. By pooling the central and state sample of ASI data, District level estimates can be prepared. The pooled ASI reports for 2010-11 and 2011-12 have been recently released and the same will be incorporated in the next base year revision.
- Karnataka is way ahead in software exports for several years, now. Its share in the All India software exports is around 33% to 36% to the total software exported. The GVA of this sector is being calculated by the Central Government, which allocates to the States, based on the private corporate employment in this sector as revealed from Employment and Unemployment Survey of 2004-05 which stood around 15% to 16%. A study has also been taken up to know the actual contribution from these services to GSDP of the State.
- The Karnataka State Strategic Statistical Plan (KSSSP) envisaged the computation of Taluk Domestic Product (TDP) estimates for the year 2008-09 with 2004-05 as base year. Since then, 2008-09 to 2010-11 taluk domestic product estimates are prepared. A publication in detail about this will be brought soon.
- On a pilot basis, the Zilla Panchayath, Kodagu has taken up a project to compute the Domestic Product estimates for all Gram Panchayaths (GP) and Urban Local Bodies (ULB). Agriculture, Livestock, Forestry, Fisheries and Mining sectors were computed based on the data available at GP level. For the other sectors, the Common Business Register of the district has been used as a frame to conduct sample surveys to derive "Value Added per Worker - VAPW". The report has been submitted to Directorate.

**Local Body Accounts in Karnataka:**

As per 1993 System of National Accounts (SNA), the whole economy consist of five mutually exclusive institutional sectors, i.e., i) Non-financial corporations, ii) Financial corporations, iii) General government sector, iv) Household sector and the v) Non Profit Institutions Serving Households sector. For the present, we are concerned with the government sector. The Government Sector (excluding public sector corporations) can be broadly divided into Administrative Departments and Departmental Commercial Undertakings (DCUs). For budget analysis, we are concerned with both. Administrative departments comprise government departments / organizations of the centre, states / UTs and the local authorities whose function is to produce and provide for the community public goods and services which otherwise cannot be provided conveniently or economically by the market. It is expected to act as an administrative agency for the social and economic policy of the country. This also includes social security funds and the NPI funded by the Government.

Contribution of Local bodies is measured as the local body's contribution to the

- State Domestic Product
- Capital Formation
- Government Final Consumption Expenditure

Directorate of Economics and Statistics, Government of Karnataka has taken up the activity of Estimation of Contribution of Local Bodies with assistance of Karnataka State Statistical Development Agency by providing the Finance and Manpower. Web based application has been developed by NIC for computerization of Budget and Accounts of all ULBs and PRIs. Two consultants were provided at each Zilla Panchayth to oversee the activity. State level training has been provided to all consultants and inturn they trained the local body functionaries at taluk level on the methodology and about the data entry into the web application.

The results of 2011-12 local bodies' data have been sent already to CSO for incorporating in the New Base Year revision of national accounts from 2004-05 to 2011-12.

Prior to collecting the annual accounts of local bodies and analyses them, DES Karnataka is using the Link Documents of PRIs. The data from these documents will provide the allocations made by the State and Central governments. Grants flown directly to the local body from the central govt. and the own resources mobilised by the local body doesn't cover in this document.

Local bodies are represents in Construction, Water Supply, Sanitary Services, Education, Health and Public Administration sectors / industries. The contribution of local bodies in Gross State Domestic Product by this method is as follows:

<i>Description</i>	<i>2009-10</i>	<i>2010-11</i>	<i>2011-12</i>
Gross Value Added from local bodies (Rs. Lakhs)	827202	991719	996170
Gross State Domestic Product at Current Prices (Rs. Lakhs)	33755850	41070316	45521235
Percentage Contribution of Local Bodies	2.5	2.4	2.2

Directorate of Economics and Statistics, Government of Karnataka has taken up the activity of local body accounts under Estimation of Contribution of Local Bodies with assistance of Karnataka State Statistical Development Agency. The information from the local bodies were collected and fed into the web based application has been developed by NIC.

The contribution of local bodies in Gross State Domestic Product by the local body accounts is as follows

<i>Description</i>	<i>2009-10</i>	<i>2010-11</i>	<i>2011-12</i>
Gross Value Added from local bodies (Rs. Lakhs)	986502	1326490	1382134
Gross State Domestic Product at Current Prices (Rs. Lakhs)	33755850	41070316	45521235
Percentage Contribution of Local Bodies	2.9	3.2	3.0

By employing these measures, the estimates of GSDP will be more realistic in the years to come.

# **METHODOLOGY OF STATE DOMESTIC PRODUCT**

## METHODOLOGY TO COMPUTE ESTIMATES OF GROSS STATE DOMESTIC PRODUCT (GSDP)

### 1. Introduction:

In the context of planned development of economy of a state by bridging Human Development Indices, the estimates of State Domestic Product (SDP); also referred to as State Income (SI) and its derivative Per Capita Income (PCI), play a crucial role. These indicators serve as sharp tools to assess, not only regional disparities between the states in the country, but also, the overall impact of various developmental programmes carried out by the Government and provide insight into the strengths and weaknesses in the economy of the State, over a period of time.

### 2. Concept and definition:

The concepts used in the preparation of income estimates at the State and National levels, vary for technical reasons. While 'Income originating' concept is used to estimate the SDP at state level, 'Income accruing' concept is in vogue at the National level. Adoption of such different concepts is due to the non-availability of accurate/reliable data on income flows across the boundaries of the state.

The State Domestic Product is defined as the "aggregate of the economic value of all goods and services produced within the geographical boundaries of the State, counted without duplication, for a specified period of time" by convention: a financial year.

### 3. Financial Intermediation Services Indirectly Measured (FISIM):

The Banking Enterprises render services to their customers by providing and maintaining their accounts under Banking services. In return for these services, customers are charged a nominal amount, which is substantially smaller, considering the expenses of this enterprise. On the other hand, banks provide loans and advances and returns on such transactions are comparatively higher to the payments made to depositors. This net return accruing to banks is large enough to meet their expenses and earn profits. If financial enterprises are treated on par with any other productive enterprise, their income in the production-account would only be limited to the charges made on customers, which would mean that the banks would have a negative operating surplus and most likely, a negative value added. To circumvent this difficulty, an imputed income, equivalent to interest and dividend receipts of banking and financial enterprises; the net amount of interest paid to depositors is defined as FISIM (income earned for services rendered) and is entered as a receipt item in the output of the financial enterprises. The output of the financial enterprises thus includes interest received, which was paid by the producing industries. As the interest paid by the industries is already accounted for in the Gross Value Added (GVA) of respective industries, its inclusion in the GVA of Banking industry amounts to duplication. To avoid this duplication, FISIM is allocated to the user industries as an intermediate input.

$$\text{GVA adjusted} = \text{GVA unadjusted} - \text{FISIM}$$

### 4. Consumption of Fixed Capital (CFC):

Consumption of Fixed Capital, (CFC), also termed as 'Depreciation' is defined as that part of the gross product, which is required to replace the fixed capital used up in the process of production during the period of account. This flow is based on the concept of the expected economic life of individual assets and is designed to cover the expected loss in value terms due to obsolescence and normal amount of accidental damage or normal wear and tear, which cannot be made good through repairs, either. It is estimated from the value of fixed capital assets based on the information of the age of various types of assets. It is not possible to estimate the CFC unless the estimates of Gross Capital Formation (GCF) and Gross Capital Stock (GCS) are prepared. At present, these estimates of CFC for all sectors of

the economy are supplied by CSO who prepares the same at the national level on allocations made to the States.

### 5. Measures relating to Income:

Gross State Domestic Product (GSDP) represents the sum of economic value of all goods and services produced within the geographical boundary of a State after deducting the necessary inputs consumed in the process of production and the Financial Intermediation Services Indirectly Measured (FISIM). From this Gross State Domestic Product, Consumption of Fixed Capital (CFC) is deducted to arrive at the Net State Domestic Product (NSDP), which is normally termed as State Income.

$$\text{NSDP} = \text{GSDP} - \text{CFC}$$

The estimate of total GSDP/NSDP so arrived at, is divided by the estimated mid-financial year population to get per capita GSDP/per capita NSDP. The per capita NSDP at current prices is termed as 'Per capita Income (PCI)'.

$$\text{PCI} = \text{NSDP at Current Prices} \div \text{mid-financial year population}$$

### 6. Division of Economy into Sectors:-

For estimating SDP, the economy of the State is broadly classified into the following three sectors, based on the similar pattern to that of the national income, which is as follows:

I	II
<b>Primary Sector</b> 1. Agriculture (including Livestock), 2. Forestry & Logging, 3. Fishing and 4. Mining & quarrying	<b>Agriculture Sector</b> 1. Agriculture (including Livestock), 2. Forestry & Logging and 3. Fishing
<b>Secondary Sector</b> 5. Regd. Manufacturing 6. Unregd. Manufacturing 7. Construction and 8. Electricity, Gas & Water Supply	<b>Industry Sector</b> 4. Mining & quarrying, 5. Regd. Manufacturing 6. Unregd. Manufacturing 7. Construction and 8. Electricity, Gas & Water Supply
<b>Tertiary Sector</b> 9. Railways, 10. Transport by other means, 11. Storage, 12. Communication, 13. Trade Hotels & Restaurants, 14. Banking & Insurance, 15. Real Estate, Ownership of dwellings, Legal & Business Services, 16. Public Administration and 17. Other Services	<b>Service Sector</b> 9. Railways, 10. Transport by other means, 11. Storage, 12. Communication, 13. Trade Hotels & Restaurants, 14. Banking & Insurance, 15. Real Estate, Ownership of dwellings, Legal & Business Services, 16. Public Administration and 17. Other Services

### 7. Method of estimation:

The Estimates of SDP from the above sectors are prepared individually by adopting one or more of the following three approaches.

- i. **Production approach:** This approach involves evaluation of all goods and services produced within the district during a period of time from which inputs and depreciation are deducted, to get the estimates of income.
- ii. **Income approach:** The aggregate income in this method is viewed to have been distributed among the four factors of production viz., Land, Labour, Capital and Enterprises in the form of rent, wages, interest and profits.
- iii. **Expenditure approach:** This is based on measurement of income at the stage of disposal. All that is produced is either ultimately consumed or a part of it is saved for future consumption or future production of goods and services. The money value of consumption expenditure plus the savings gives the Income.

Approach	Sector
Production Approach	Agriculture (including Livestock), Forestry & Logging, Fishing, Mining and Quarrying and Manufacturing (registered) sectors.
Income Approach	Manufacturing (Unregistered), Electricity, Gas and Water supply, Transport, Storage and Communication, Trade, Hotels and Restaurants, Banking and Insurance, Real Estate and Business Services, Public Administration and Other Services.
Expenditure Approach	Construction sector and Forestry (fuel wood consumption)

### 8. Base Year:

The GSDP is measured for an accounting year in the State, at the prices prevailed during that accounting year. When this is compared over the years, the GSDP is affected by the changes in production as well as changes in prices. To eliminate the effect of prices, the GSDP will be prepared at the prices of selected year known as "base year". The estimates at the prevailing prices of the current year are termed as "at current prices", while those prepared at base year prices are termed "at constant prices". Economy "In real terms" means, the comparison of the estimates at constant prices over the years, since it gives the measure of real growth of a State's economy.

In the past, GSDP was revised decennially by changing the base to a year, which ends with 1. It was primarily because, in the base year estimates of income aggregates, the information on work force plays an important role and work force estimates are obtained from the Population Census conducted decennially in the years ending with 1 (eg. 1970-71, 1980-81, etc.). This practice continued upto the series with base year 1980-81. Since then, the CSO started using the work force estimates from the results of Quinquennial Employment and Unemployment Surveys conducted by National Sample Survey Organisation (NSSO), which are taken up once in every five years, and consequently started revising the base years of National Accounts Statistics once in every five years coinciding with the years for which the NSSO conducts the Quinquennial Employment and Unemployment Surveys.

The list of Base Years till 2004-05, are presented below:

1. 1948-49 base year (introduced in 1956)
2. 1960-61 base year (in Aug 67) after 11 years
3. 1970-71 base year (in Jan 78) after 11 years
4. 1980-81 base year (in Feb 88) after 10 years
5. 1993-94 base year (in Feb 99) after 11 years
6. 1999-00 base year (in Jan 06) after 7 years
7. 2004-05 base year (in Jan 2010) after 4 years

#### 9. Periodicity of Estimates:

Recently the Central Statistical Office, Ministry of Statistics and Programme Implementation, Government of India, issued a note on revision of nomenclature of GDP estimates. The same has been adopted at the state level with few corrections, which is presented here under:

Sl. No.	Estimates	Period
1	Advance Estimates (AE)	2 months before the completion of the Current Year
2	First Revised Estimates (FRE)	10 Months after the completion of the year
3	Second Revised Estimates (SRE)	22 Months after the completion of the year
4	Third Revised Estimates (TRE or Reconciled Estimates)	28 Months after the completion of the year

Advance estimates of SDP is based on the data on Agriculture, budget estimates of current year, partial information on Fishing, Mining, Transport and part of sub sectors of other services. The estimates of the remaining sectors are prepared on the basis of past trends, noticed in earlier estimates.

For first revised estimates, the data on Agriculture Sector is based on final forecast of Agricultural Production and Fishing, Index of Industrial Production, Revised Estimates of Budget documents and Annual Accounts of Non-Departmental Enterprises (NDCUs). Provisional figures in respect of Forestry, Construction and most of the Tertiary Sectors are used for the preparation of quick estimates.

The second revised estimates are based on district-wise fully revised estimates of production of Agriculture, Horticulture and Live Stock Products. The estimates of other sectors are based on data available on the actual figures provided in budget documents pertaining to Production of Fisheries and Forest Products, Mining, Transport, Trade, Real Estate, Business & Legal Services and also Other Services. Where ever the SDP of Central Government is needed, the related values are extrapolated for further years, using the past trends on previous years' contribution in the same sub-sectors or moved with the All India GDP trends.

During the reconciliation of SDP estimates, the second revised estimates will be revised by replacing the estimated figures with actual contribution of Central Government and reconciling the state level data. This will be held after two years of preparing the advance estimates.

#### 10. Methodology for preparation of SDP Estimates:

##### (1) Agriculture (Proper)

This activity comprises Agriculture Proper, Livestock and Livestock Products and Operation of Irrigation Systems. The economic activities included in Agriculture Proper are: (i) growing of field crops, fruits, nuts, seeds and vegetables, (ii) management of tea, coffee and rubber plantations, (iii) agricultural and horticultural services on a fee or on contract basis such as harvesting, baling and thrashing, preparation of tobacco for marketing, pest

control, spraying, pruning, picking and packing and (iv) ancillary activities of cultivators such as gur making, transportation of own produce to primary markets, activities yielding rental income from farm buildings and farm machinery. Livestock and Livestock Products include breeding and rearing of animals and poultry besides private veterinary services, production of milk, wool, slaughtering, preparation and dressing of meat, production of raw hides and skins, eggs, dung, raw wool, honey and silk worm cocoons etc. Operation of irrigation system comprises supply of water through various Government channels to the agricultural producers. Agriculture and livestock activities go together as it is not always feasible to segregate the various inputs such as livestock feed, repairs and maintenance costs, CFC etc., into those used in agricultural and livestock production.

**Agriculture Output:** The estimates of GSDP for this activity are compiled by the production method, except for the operational irrigation systems implemented by Government, for which the income method is followed. As mentioned earlier, the value of output is worked out for Agriculture and Livestock separately but the value-added estimates are prepared for combined activity. The value of output of each crop is obtained as a product of area, yield and price (or production and price), as the case may be.

The estimates of area and output of principal crops are provided by the State Directorates of Agriculture/State Directorates of Economics and Statistics (DES), depending upon, whichever agency is declared as the State Agricultural Statistics Authority (SASA).

In respect of horticultural crops, information on area and output is taken from the State Directorates of Horticulture/SASAs/National Horticulture Board (NHB), depending upon the data availability. The information on area and production in respect of Floriculture is obtained from the office of Horticulture Departments or NHB. Similarly, in the case of sugarcane, output, excluding the quantity of crop converted into Gur by cane growers, is estimated and output of Gur, is evaluated separately. The estimates of output for miscellaneous and unspecified crops are obtained by applying the appropriate average value of Yield Per Hectare (YPH) and area under the crop. The value of by-products viz.: stalks, straw, etc. are estimated by applying the YPH as available from the cost of cultivation studies (CCS).

In case of such crops for which production data is available, valuation of crop output is done by multiplying the quantities of production with the corresponding producers' prices. The sources of data used and the method of preparation of estimates of value of output are given as here under:

- The estimates of turn-outs for principal crops are based on the results of the Crop Estimation Surveys conducted annually by the State Government Agencies. These are compiled and published annually by the State Agriculture Statistics Authorities (SASAs) in the form of Annual Season and Crop Reports (ASCR). For evaluation purposes of these crops, the Producers' Prices, corresponding to average wholesale prices prevailing in the primary markets during the peak marketing periods are adopted. The peak marketing periods considered in Karnataka is as follows:

#### Peak marketing periods for different agricultural crops

Sl. No	Crop	Season	Month for which prices are collected *
01.	Paddy	Kharif	12,1,2
		Rabi & Summer	5,6,7
02.	Wheat		2,3,4
03.	Jowar		2,3,4,5
04.	Bajra		10,11,12,1

Sl. No	Crop	Season	Month for which prices are collected *
05.	Maize		12,1
06.	Ragi		11,12,1
07.	Gram		1,2,3,4,5
08.	Tur		1,2,3,4
09.	Blackgram	Kharif	9,10,11,12,1
		Rabi	2,3,4,5
10.	Greengram	Kharif	9,10,11,12,1
		Rabi	2,3,4
11.	Horsegram	Kharif	12,1
		Rabi	1,2,3,4
12.	Linseed		1,2,3,4,5
13.	Sesamum		8,9,10,11,12,1
14.	Groundnut	Kharif	9,10,11,12,1
		Summer	5,6,7
15.	Rape & Mustard		12,1
16.	Castor seed		1,2,3
17.	Safflower		2,3,4,5
18.	Nigerseed		1,2
19.	Coconut		7 to 6
20.	Gur		1,2,3,4,5,6
21.	Cotton (kapas)		1,2,3,4,5
22.	Sunhemp		7 to 6
23.	Mesta		1,2
24.	Tobacco		1,2,3,4,
25.	Cardomom		9,10,11,12,1,2
26.	Dry Chillies		1,2,3,4
27.	Black pepper		3,4
28.	Dry ginger		12,1
29.	Turmeric		4,5
30.	Garlic		7 to 6
31.	Arecanut		9,10,11,12,1,2
32.	Banana		8 to 6
33.	Mango		6
34.	Citrus fruits		12,1
35.	Grapes		2,3,4
36.	Papaya		7 to 6
37.	Cashewnut		3,4,5,6
38.	Potato		9,10,2,3,4
39.	Sweet potato		11,12,1
40.	Tapioca		1,2,3
41.	Onion		9,10,11,12,1,2,3,4

\* Number in column 4 indicates calendar month.

- The wholesale prices are collected by the Agriculture Produce Marketing Committees of State Agriculture Departments or by the DESAg under the market intelligence scheme of DESAg. For averaging the weekly wholesale prices available from the selected primary markets, the following procedures are adopted.
- Arithmetic averaging of the prices at the various centers within a district is done to get the weekly district prices, for each crop
- Average price for a district, is worked out as the arithmetic average over the 'peak marketing period' of weekly prices obtained as above.
- State average price is obtained as a weighted average of the district wise prices, weights being the district-wise production of the corresponding crops.

In respect of coffee, rubber and opium, the statistics of production and prices are obtained from the Coffee Board, Rubber Board and Central Bureau of Narcotics, respectively. In case of tea, the estimates of output available from Tea Board relate to production of processed tea, instead of raw tealeaves. The production of tea leaves has been estimated as 4.44 times the processed tea, the source of which is the Tea Board.

In respect of unspecified and miscellaneous crop and crop groups viz. (a)other cereals, (b)other oil seeds, (c)other sugars, (d)other fibres, (e)dyes and tanning material, (f) other drugs and narcotics, (g)other condiments and spices, (h)other fruits and vegetables and (i)miscellaneous crops (fodder, grass, misc. food and non food crops), the turn-out estimates are not directly available for all these crops. To the extent possible, only data on related crops is utilized. The value of output in respect of these crop groups is estimated by utilising area estimates under these crop groups as available from the annual publication, 'Land Utilisation Statistics (LUS)' of state agencies. To arrive value of yield per hectare to the total estimated area under each of these groups/crop groups, the estimates of value of output is obtained by applying following method.

Weighted average prices of Small Millets	75 percent of weighted average price of Jower, Bajra, Maize and Ragi
Value per hectare of other cereals	Weighted average value of yield per hectares of Jower, Bajra, Maize and Ragi
Weighted average price of other pulses	85 percent of weighted average prices of Tur, Blackgram, Greengram and Horsegram
Value per hectare of other oil seeds	90 percent of yield per hectare of Linseed, Safflower, Sesamum, Castor and Nigerseed
Value per hectare of other sugars	50 percent of Value per hectare of sugarcane
Other Drugs and Narcotics	90 percent of value per hectare of Tobacco leaves and Stems
Other Condiments and Spice	90 percent of value per hectare of Coriander, Cardamom, Dry chilly, Black pepper and Dry Ginger, Garlic and Turmeric
Other Fruits and Vegetables	Weighted average price of all fruits and vegetable crops for which separate data is available

In respect of fruits and vegetable crops, data is being published annually by the State Horticulture Department (SHD). Floriculture activity too has been taken into account separately for the first time in 1993-94 series of national and state accounts. Data on area production and prices of flowers are available from annual publications of SHD. Production of these crops in foreyard/backyard of houses was included in the value of output of agriculture sector for the first time in the National Accounts, in the 1993-94 series.

### Livestock

The Livestock sector for the purpose of estimation of value of output has been divided into 7 broad groups. The groups are:

- Milk
- Meat
- Eggs
- Wool
- Dung
- Silk Worm, Cocoons and Honey
- Increment in stock.

Evaluation of Livestock production is done by multiplying the quantities of production by the corresponding producer's prices. The source of data used in the preparation of the value of output is as under:

- The Department of Animal Husbandry and Veterinary Sciences conduct every year, the Integrated Sample Survey (ISS), covering milk, egg, meat and wool. Through these surveys the yield estimates of these products are available. The data on livestock population is estimated using the results of five-yearly livestock censuses. Using the projected livestock population and the yield estimates from the ISS, the estimates of production of livestock products is compiled by the State agencies.
- Meat group comprises of Meat (Beef, mutton, pork including edible offals and glands and poultry meat), meat products (fats, heads, legs) and by-products comprises hides (cattle and buffalos hides), skins (goat & sheep skin) and other products (guts, blood, bones, horns, hoofs, tail stump, useless meat and esophagus). Annual meat production estimates are directly compiled by the State DESs from the data relating to prices and production, received from State Animal Husbandry Departments and State DESs. The State's Animal Husbandry Departments furnish data on number of slaughtered animals and production of meat. The latest Indian Livestock Census results are used to generate annual data on population of various categories of Livestock. Out of the total meat production, 7.08% is transferred to Manufacturing sector as input and the remaining 92.92% is taken as Gross Value of output under meat.

The estimates of other meat products and by-products are based on number of slaughtered animals and fallen animals, wherever applicable and the corresponding yield rates. The basic data relating to yield rates of edible offals, fats and other by-products (viz. guts, esophagus, tail stumps, useless meat, blood, bones, horns and hoofs) are based on the studies conducted by the CSO and some States in 2005. The outturn estimates are worked out for each category of animals by applying the state-wise average yield rates on the estimated annual number of slaughtered animals. Hides and skins are obtained from: a) animals slaughtered for production of meat and b) animals fallen due to natural death. Estimates of the number of animals fallen are estimated by the Animal Husbandry departments on the basis of the movements in the estimated population of animals. The estimates of poultry meat are prepared using the information on utilization of eggs and chicken survived. This data is collected through ISS in some of the states. Indian Agricultural Statistics Research Institute (IASRI) and some of the State Animal Husbandry departments have also conducted poultry surveys and collected this data. Poultry meat is estimated in terms of number of adult fowls & chickens dressed.

The estimates of camel hair, goat hair and pig bristles are prepared on the basis of information on yield per animal, available from the studies conducted by the CSO in some States in 2005. The benchmark estimates of hair and bristles are carried forward using relevant category of population of these species.

The estimates of production of dung are prepared on the basis of information available through ISS. Dung is used as manure and fuel. The utilization rates of dung for a) dung used as manure and b) dung used as fuel are based on the studies conducted by some of the States.

The annual outturn of estimates of silkworm cocoons by types (viz. mulberry, tasar, ericot and muga) obtained from Central Silk Board and Khadi and Village Industries Commission (KVIC) respectively on regular basis provide the requisite information on these items.

The annual net increase in the population in each state is estimated respectively for each category of livestock on the basis of livestock population projections. The population is projected on the basis of inter-censal population growth of animals. The latest Livestock Census results are used for this purpose. The prices of livestock products are collected from State Animal Husbandry Department.

**Inputs:**

**Seed:** Seed rates are supplied to the states by the CSO based on the Cost of Cultivation Studies (CCS) conducted by the Directorate of Economics & Statistics, Ministry of Agriculture, Government of India, through the Agricultural Universities.

**Fertiliser/Manure:** The estimates of consumption of chemical fertilisers in different States are available from the data on dispatches to different States, published by the Fertiliser Association of India (FAI). The estimates of organic manure (which is the same as the output of dung manure included under the livestock output) are made using the data provided by the 5-yearly Livestock Census (ILC) in respect of bovine and ovine population and the evacuation rates derived from the annual Integrated Sample Survey (ISS).

**Feed of livestock:** The entire value of cane trash, fodder and grass are 95 per cent of value of stalks and straw are considered as value of feed. The estimates of concentrates, salt and medicine are based on the results of NSSO surveys. The estimates of feed of livestock are supplied to states by CSO.

**Irrigation Charges:** The information on receipts from water rates, which include payments made by the agricultural producers to the Government in lieu of water supplied to them from Government owned canals and other means of irrigation is culled out from the State Government budget documents.

**Market charges:** Estimates of market charges paid by agricultural producers for various commodities are prepared by the CSO and made available to states. These are estimated, using the data available from the survey on market margins on major crops, which is conducted by the DESAg. Presently, this rate is 3.22%

**Electricity:** Electricity supplied for agriculture sector is taken as input information which is available from the Annual Accounts of State Electricity Boards.

**Diesel Oil:** The estimates are prepared and supplied by CSO based on consumption of diesel oil per engine, per tractor, collected through the cost of cultivation studies. The data on number of diesel engines and tractors, at State level, is collected from the Indian Livestock Census (ILC) and the State Transport Departments.

**Repairs and Maintenance:** These estimates are prepared by CSO using the results of 'All India Debt & Investment Surveys', supplied to states.

**2. Forestry and Logging:**

The economic activities considered in this activity include (i) forestry (e.g., planting and conservation of forests, gathering of forest products, charcoal burning carried out in the forests), (ii) logging (e.g., felling and rough cutting of trees, hewing or rough shaping of poles, blocks, etc.) and transportation of forest products to the sale depots/assembly centers and, (iii) farmyard wood (industrial wood and fuel wood collected by the primary producers from trees outside regular forests).

The forest products are classified into two broad groups viz., (a) major products comprising industrial wood (timber, round wood, match and pulpwood) and fuel wood (firewood and

charcoal wood), (b) minor products comprising a large number of heterogeneous items such as bamboo, fodder, lac, sandalwood, honey, resin, gum, tendu leaves, etc.

Estimates of GSDP are prepared by following the production method. Gross value of output is estimated separately for (a) Industrial wood, (b) Trees Outside Forest, (c) Fuel wood and (d) Minor forest products. Estimates of industrial wood are based on data received from the office of the Principal Chief Conservator of Forest (PCCF) in the state for recorded production. Since the value of unrecorded production is not available regularly, 10% of the value of recorded production is taken as the value of unrecorded production. For evaluating the value of output of industrial wood, prices, as available from forest sale depots and supplied by PCCF are used. The value of fuel wood, from the consumption side, is estimated using the results of NSSO consumption expenditure surveys during the previous two quinquennial rounds. The estimates so derived are reduced by the actual value of agriculture by-product, namely, cotton sticks, arhar sticks, jute sticks and baggase, which is taken into account in the agriculture activity (to avoid double counting), since these by-products are consumed as fuel by the households. These estimates are then inflated by 6 percent to account for consumption of fuel wood by the industries and on funerals. Estimates of minor forest products are based on data directly available from the office of the PCCF. In the absence of information on inputs, 15.6 per cent of the value of output is taken as inputs.

### **3. Fishing:**

The activities covered in the fishing are (i) commercial fishing in (a) ocean, coastal and offshore waters and (b) inland waters, which include catching, tackling and gathering fish from rivers, irrigation and other canals, lakes, tanks, fields inundated tracts etc., (ii) subsistence fishing in inland waters and artificial ponds, (iii) gathering of sea weeds, sea shells, pearls, sponges and other ocean and coastal water products and (iv) fish curing viz., salting and sun-drying of fish.

Estimates of GSDP of this activity are prepared by following the production method. Gross value of output is estimated from output and prices of inland, marine fish (including deep sea fishing) and prawns/shrimps (sold in raw form), sun dried fish, salted fish, frozen and smoking fish as furnished by the State Commissionerate/Directorate of Fisheries. Estimates of subsistence fishing are also included in the GSDP of the state, which is estimated at 12.5% of the value of output of inland fish. The value of inputs and operational costs is taken as 22.5%, 10%, 22.5%, 1% and 1% of the value of output for the items, marine fish, inland fish, prawns, subsistence fish and salted fish respectively, as supplied by the CSO.

### **4. Mining and Quarrying:**

The economic activities covered in this activity, comprise extraction of minerals which occur in nature as solids, liquids or gases; underground and surface mines, quarries and oil wells, with all supplementary operations for dressing and beneficiating ores and other activity such as crushing, screening, washing, cleaning, grading, milling, floatation, melting, pelletising, topping and other preparations needed to render the material marketable. All these activities are covered to the extent they are carried on at the mine site or upto the first point of sale. Production of rock salt is included, as also the production of salt obtained by evaporation of water from sea, lakes, etc. However, large expenditures on preparing mining sites, prospecting and boring activities are not included here as they are included under the 'construction' industry.

Estimates of GSDP in this industry are compiled following the production method of calculating the value of output of each mineral in the state and deducting there from the value of corresponding inputs. State-wise and mineral-wise data on output (production & prices) of all minerals (except minor minerals, crude petroleum & natural gas) are obtained from the publication of Indian Bureau of Mines (IBM), Nagpur. Production in respect of

minor minerals is collected from State Directorate of Geology and Mining. The deductible rates (i.e. inputs) in respect of all minerals, except minor minerals and fuel minerals are obtained from IBM. Input rates for minor minerals are based on NSSO survey or IBM.

#### **5. Registered Manufacturing:**

Manufacturing process, in general, is defined as any process for making, altering, repairing, finishing, packing, oiling, washing, cleaning, breaking up, demolishing or otherwise treating or adapting any article or substance with a view to its use, sale, transport, delivery or disposal. Railway workshops are included under manufacturing and not under railways. Conversion of sugarcane into indigenous gur, slaughtering of animals and dressing of meat carried out by farmers and individuals are excluded from the scope of manufacturing activities, as these are included under agriculture and allied activities. Production in defence establishments is included under manufacturing. Since the 1999-2000 series, the repairing services have been excluded from manufacturing industry and moved to trade activity.

For the purposes of estimation of GSDP, the entire manufacturing activities are classified into two broad segments, namely, manufacturing - 'registered' and 'unregistered'. The registered manufacturing segment covers all manufacturing factories registered under sections 2m(i) and 2m(ii) of the Indian Factories Act, 1948 which respectively refer to the factories employing 10 or more workers and using power or those employing 20 or more workers but not using power on any day of the preceding 12 months and beedi and cigar establishments registered under Beedi and Cigar Workers (Condition of Employment) Act, 1966 and employing 10 or more workers using power or 20 or more workers and not using power.

A 'factory' or an 'establishment', in the context of registered manufacturing, is defined as any premises including the precincts thereof (i) whereon 10 or more workers are working or were working on any day of the preceding 12 months, and in any part of which a manufacturing process is carried on with the aid of power or is ordinarily so carried on or (ii) whereon 20 or more workers are working or were working on any day of the preceding 12 months, and in any part of which a manufacturing process is being carried on without the aid of power or is ordinarily so carried on – but does not include a mine subject to the operation of the Mines and Minerals (Regulation and Development) Act, 1957 or a railway running shed.

Estimates of GSDP for registered manufacturing are prepared by following the production method. The industry-wise estimates are prepared on the basis of results of Annual Survey of Industries (ASI). Earlier, estimates of value added published in ASI Summary Results were not adjusted for non-responding factories, therefore, adjustments were made for this in the national accounts. For the non-responding units, from the year 1995-96 onwards, however, ASI results are published after adjusting for non-response.

Since the repairs of Locomotives and other rail road equipment (NIC-1987 industry group 597) is not adequately captured under ASI, the same is now taken from the budget documents of Railways at the national level and apportioned among the States by the CSO using appropriate indicators.

For the years for which ASI results are not available, the growth observed in the Index of Industrial Production (IIP) or the State IIP is used. These estimates undergo changes as soon as ASI results become available.

#### **6. Un-registered Manufacturing:**

The unregistered manufacturing segment, being complementary to registered manufacturing segment, covers all those units which are not covered under registered manufacturing segment. In other words, this segment covers all the manufacturing,

processing, repair & maintenance services of units employing less than 10 workers (using power) or less than 20 workers (not using power). By implication, it also covers own account enterprises (OAE) engaged in manufacturing activities. Estimates for manufacturing (unregistered) are first compiled for the base year.

Estimates for subsequent years:

- (i) Estimates for subsequent years are first worked out at constant prices and the constant price estimates are then inflated by relevant price indices to obtain the current price estimates for the corresponding years. The estimates at constant prices for the subsequent years are worked out by moving forward, industry-wise estimates for the year 2004-05 with the help of IIP/State IIP.
- (ii) Industry group-wise estimates at current prices are obtained by inflating the constant price estimates with the corresponding Wholesale Price Index (WPI), which at compilation category level is the same as the one which has been used to deflate the current price estimates of registered manufacturing industry.

### **7. Electricity, Gas and Water Supply:**

The economic activities relating to generation, transmission and distribution of electric energy and wind energy are covered under the electricity sub-sector, the manufacture of gas in gas works including gobar gas and distribution through mains to household, industrial, commercial and other users are covered under the gas sub-sector and the activities associated with collection, purification and distribution of water excluding the operation of irrigation system are covered under water supply sub-sector. The production of LPG has been included under manufacturing and only supply of gas through pipelines, where it cannot be alienated from the activity of its manufacturing is included in the gas sub-sector.

**Electricity:** The GSDP estimates in this sub-sector are prepared using the income method. The estimates are based on the analysis of annual accounts of State Power Generation, Transmission and Distribution Companies and other electricity undertakings located in the State. The value added estimates of central undertakings, viz. National Thermal Power Corporation, National Hydro Power Corporation and Power Grid Corporation made available by the CSO are also added.

**Wind Energy:** The wind energy produced in the State is collected from Karnataka Renewable Energy Corporation Ltd. Cost estimate per unit of output and input costs are made available by the CSO to prepare the estimates.

**Gas:** The Gas sub-sector comprises Gobar Gas and other Gas. The estimates of Gobar Gas are compiled using data available from the Ministry of Non-Conventional Energy Sources and Khadi & Village Industries Commission (KVIC). In the absence of input structure, the gross value of output of Gobar Gas is treated as value added, on the assumption that, the value of Gobar used in manufacturing of Gas, also results in equivalent value of by products in the form of indigenous fertilizers (manure). The estimates of GSDP in respect of Gobar Gas are prepared on the basis of value of production per plant (estimated on the basis of KVIC data) multiplied by total number of plants installed up to the current year, as furnished by Ministry of Non-Conventional Energy Sources.

**Water Supply:** The estimates of SDP for water supply are compiled for the public and private sectors separately following the income method.

**Public sector:** The estimates of public sector in respect of State Government are culled out from the Budget documents where as those for Local Bodies are based on the information obtained from State Water Supply & Sewerage Boards and Budget Link documents for Panchayat Raj Institutes (PRI) and Urban Local Bodies (ULB).

**Private sector:** The estimates of private sector are prepared separately for rural and urban areas, using NSS workforce and average compensation of municipal workers engaged in Water Supply services.

### **8. Construction:**

The construction activity as per the International Standard Industrial Classification (ISIC) adopted in the System of National Accounts (SNA) consists of contract construction by general builders, civil engineering contractors and special trade contractors. Construction carried out by independent units of enterprises or other organisations, which are not part of the proper construction industry, are also included. But, owing to the problems of availability of data separately for units carrying out construction work, construction industry, for the purpose of estimating domestic product, is taken to include the whole of construction activity (contractual as well as own account) including construction work connected with planting and cultivating of new forests, plantations and orchards. Thus the scope of the industry is wider than that outlined in the NIC, 1998. Due to lack of data, demolition activities have, however, been excluded.

The estimates of value added from construction activity are prepared independently for the following categories by adopting expenditure method, i.e. by taking into account the expenditures made on construction.

- Public sector covering (1) State Government administrative departments, local bodies, all state departmental enterprises of both, state and local bodies; (2) Central Government administrative departments and departmental enterprises other than Railways, Communication and repair and maintenance expenditure in respect of Defence Services; (3) Railways, (4) Communications; (5) non-departmental commercial undertakings excluding Air and Water transport, Banking and Insurance (only capital expenditure).
- Household Sector covering (1) Rural residential buildings, (2) Urban residential buildings, (3) Rural non-residential buildings, (4) Urban non-residential buildings, and (5) Rural and urban other construction works in the household sector.
- Residual comprising of construction undertaken by private corporate sector, other private un-incorporated enterprises and private non-profit institutions including quasi corporate bodies, besides part of public sector namely, air and water transport, banking and insurance, public non-profit institutions including quasi-Government bodies, repair and maintenance expenditure in respect of Defence Services and the entire repair and maintenance expenditure in respect of non-departmental commercial undertakings.

The data on expenditure on new construction, repair and maintenance of the state government administrative departments and their departmental enterprises are directly available from the analysis of the relevant budget documents. In case of local bodies, the data is directly collected from these local bodies in the state. Data on capital expenditure for Non Departmental Commercial Undertakings (NDCUs) are made available to states by the CSO. Data on expenditure on new constructions, repair and maintenance of the Central Government Administrative Departments (except for Defense Services), local bodies and their departmental enterprises (except railways and communication), are available from the analysis of the central budget documents, prepared by the CSO and made available to the States. For Railways and Communication, the estimates are prepared by the CSO and made available to states.

The state-wise estimates of expenditure on new construction and repairs and maintenance in rural and urban residential buildings, are available in the latest All India Debt & Investment Survey (AIDIS). These estimates of expenditure on new construction and repairs & maintenance as available from this publication are moved to later years with the

help of geometric growth rate of rural and urban census dwellings based on 1991 and 2001 Population Census data. Price changes are superimposed with the help of the index of cost of construction of rural/urban buildings to obtain the estimates at current prices.

The estimates available from AIDIS are moved to later years with the help of weighted index of value of output from 'agriculture excluding livestock' and 'registered manufacturing'. The estimates of gross value of output from residual category are prepared by CSO and made available to states. The estimates of 'residual category' are allocated to the states by the CSO on the basis of state-level data on workforce estimates, cement dispatches and steel dispatches.

### **Transport, Storage and Communication:**

The economic activities covered in this sector are (i) transport by railways, (ii) transport by other means, namely, road transport (mechanised and non-mechanised), water transport (coastal, ocean and inland), air transport and services incidental to transport, (iii) storage and (iv) communication services rendered by Post & Tele-communication Departments and Overseas Communication Services.

### **9. Railways:**

The budget documents of the railway services which is integral part of Central Government budget documents include allied activities which according to standard industrial classification, should belong to the respective sectors. Following this principle, railway workshops and railway manufacturing establishments like the Chittaranjan Locomotive Works, Integral Coach Factory, Diesel Locomotive Works and Railway Wheel Factory are excluded from railway transport and included under the 'manufacturing' activities. Construction activity of the railways is also excluded and taken into account in the 'construction' sector. Expenditure on education, medical & health services are also excluded here and included in 'other services'. Estimates of GSDP for railways are considered as part of supra-regional sectors and estimates for these sectors are provided by the CSO to the States.

### **10. Transport by other means:**

**Mechanised Road Transport (Public sector):** The estimates of GSDP for this segment are obtained through economic analysis of annual reports/accounts for non-departmental transport undertakings in the state.

**Mechanised road transport (Private sector):** The state-wise estimates of GVA at current prices are prepared activity-wise by multiplying work force with Value Added Per Worker (VAPW) separately for the rural and urban areas for each year. The total State-wise work force data for the current years are obtained by extrapolating the base year (2004-05) workforce estimates for the three categories (6021, 60221 and 60231 of NIC of 1998) of mechanised road transport with the indicator of number of vehicles registered in the state. The VAPW for the respective categories for 2004-05 has been taken from the Enterprise Survey of NSS 63rd Round (2006-07), for rural and urban areas separately. VAPW available from this survey are moved to other years with the help of Consumer Price Index of Industrial Worker (CPI-IW) for urban areas and CPI of Agricultural Laborers (CPI-AL) for rural areas respectively.

**Non Mechanised Transport:** GVA estimate has been prepared by multiplying the workforce with VAPW available from the Enterprise Survey 2001-02 results for the respective NIC codes. In the new series, the GVA per worker has been taken from the Enterprise Survey of NSS 63rd round (2006-07). The work force estimates have been prepared using the results of NSS 61st round survey on Employment - Unemployment (WPRs) 2004-05 along with the data on population from the Population Census 2001.

**Service Incidental to Transport:** The economic activities of Airport Authority were included under Air transport sub-sector in the 1993-94 series. This has now been shifted to the sub-sector 'service incidental to transport'. Similarly, supporting service to water transport which was part of water transport, has been shifted to 'service incidental to transport' in the new series. The estimates of Non Mechanised transport and Service incidental have been moved to further years with the help of Index of Commodity Producing sectors.

**Water transport:** The estimates of GSDP for organised inland water transport in respect of a state are prepared by respective DESs by analysing the annual accounts of state inland water transport companies or State Budget documents. The all-India estimates of gross value added from the shipping companies in public and private segments are prepared by the CSO and allocated to the States using suitable indicators. Similarly, the state-wise estimates of gross value added from ports and pilotages are also prepared by the CSO by analysing relevant reports/budget documents and made available to the States. The state-wise estimates of gross value added generated from lighthouses and ships handled by the Centre and Dredging Corporation of India and Inland Water Authority too are prepared by the CSO and made available to the states.

**Air Transport:** The gross value added for this part is being estimated by CSO at national level and apportioned to the states based on relevant indicators. The estimates thus prepared by CSO are made available to the states.

#### **11. Storage:**

The estimates in respect of public warehousing (other than Central Warehousing Corp.) are based on the analysis of annual accounts of state warehousing corporation. The value added from Central Warehousing Corporation and Cold Storage are also prepared by the CSO and allocated to the states in proportion to the average capacity of central warehousing in various states. The estimates of GSDP from storage n.e.c. are allocated to different states by the CSO in proportion to the number of workers as in the base year.

#### **12. Communication:**

**Public:** The budget documents of the communication services which are integral part of Central Government budget documents include allied activities which according to standard industrial classification should belong to respective sectors. Following this principle, the activities relating to post office savings bank, postal life insurance and telecommunication workshops are excluded from communication and included in `banking`, `insurance` and `manufacturing` sectors respectively. Estimates of GSDP communications are considered as part of supra-regional sectors and estimates for these sectors are provided by the CSO to the States.

**Private:** The economic activities covered under this are (i) Courier activities (NIC-98, code-64120), (ii) Activities of the cable operators (NIC-98, code-64204) and (iii) Other communication (NIC-1998, code- 642 (-) 64204).

**Courier Services:** The estimates of GVA for courier services have been compiled for private corporate and unorganised sector by using the estimates of value added per worker (VAPW) from the results of NSS 63rd round survey on services sectors and workforce estimates from Employment–Unemployment Survey, 2004-05 along with Population Census 2001. The estimates have been compiled separately for Rural/Urban/Private Corporate and un-organized segments.

**Activities of cable operators:** The estimates of GVA for cable operators have been compiled for private corporate and unorganised sector by using the estimates of value added per worker (VAPW) from the results of NSS 63rd round survey on services sectors

and workforce estimates from Employment –Unemployment Survey, 2004-05 along with Population Census 2001. The estimates have been compiled separately for Rural/Urban/Private Corporate and un-organized segments.

Communication services other than those of couriers and cable operators: The activities covered under this compilation category are all communication activities in the private sector other than those of couriers and cable operators. This sub-sector covers the activities of cellular and basic telecom services, and the activities of public call offices (PCOs).

The GVA estimates of private corporate sector have been prepared as a product of the average revenue per user (ARPU) per month and number of subscribers. The GVO/GVA ratio of sample private cellular companies has been applied on the revenue so obtained to get the GVA for this activity. The details of GVO to GVA ratio of sample private corporate companies are obtained from their annual accounts. The sample companies analysed in the new series had a market share of over 70% in 2004-05.

The estimates of GVA for unorganized sector for other communication services for the year 2004-05 have been compiled using the estimated VAPW from NSS 63rd round survey results and the estimated workforce in the activity, separately for Rural/Urban segments.

### 13. Trade, Hotels and Restaurants:

The Trade sector includes wholesale and retail trade in all commodities whether produced domestically, imported or exported. It covers activities of purchase and selling agents, brokers and auctioneers. Wholesale trade covers units, which resell without transformation, new and used goods generally to the retailer and industries, commercial establishments, institutional and professional users or to other wholesalers. Retail trade covers units, which mainly resell without transformation new and used goods for personal or household consumption. Presently, this sector too comprises of maintenance and repair of motor vehicles and repair of personal household goods. As per NIC 1998 classification, this sector consists of following five categories:

- Maintenance and repair of motor vehicles (502+50404);
- Sale of motor vehicles (50-502-50404);
- Whole sale trade except of motor vehicles + Auctioning activities (51+74991);
- Repair of personal household goods (526); and
- Retail trade (except motor vehicles) (52-526).

The hotels and restaurants sector covers services rendered by hotels and other lodging places, restaurants, cafes and other eating and drinking places. As per NIC 1998 classification, it consists of following two categories:

- Hotels, camping sites etc (NIC 98 code-551); and
- Restaurants, bars and canteens (NIC 98 code-552).

The estimates of GSDP for this segment of activities are prepared separately for public, private organised and private un-organised parts.

- **Public Sector:** The estimates of GSDP for public part in the Centre are prepared by the CSO, whereas the part relating to state governments are prepared by the State DESs on the basis of analysis of the budget documents of central/state/local governments and annual accounts of NDCUs. The CSO allocates the central part of value added to the states.
- **Private organised segment:** Estimates for private organised part are first prepared at national level using RBI studies of company finances of a sample of companies and information available from NABARD on cooperative societies. Then, the national level GVA estimates are allocated among states in proportion to respective private corporate workforce obtained from NSS 61th round survey on Employment - Unemployment 2004-05 by the CSO and made available to states.

- **Private un-organised segment:** The Base Year (2004-05) estimates of private un-organised sector of Trade, Hotels and Restaurants have been prepared as a product of VAPW and work force. For trade sector, the workforce estimates have been prepared using the results of NSS 61st round survey on Employment – Unemployment (WPRs) conducted by NSSO in 2004-05 along with the data on population from the Population Census 2001. The value added per worker, used for the new series is that of all enterprises category, available in informal sector survey conducted in NSS 55th round (1999-2000), since no fresh survey on trade sector was conducted by the NSSO. In the case of hotels and restaurants, the VAPW is taken from Enterprise survey conducted during 63rd round of NSS (2006-07). For the base year, the estimates from private un-organised sector of trade and hotels and restaurants are prepared separately. For subsequent years, the base year estimates of trade, hotels & restaurants are moved with the help of Index of State Gross Trading Income (GTI) of commodity producing sectors, which is computed both, at current and constant prices. The GTI is computed using the marketable surplus ratios of the commodities produced and the trade margins in respect of these commodities. In view of the volatility in the estimates of GTI, another recommended method for moving forward the base year estimates is, the sales tax/VAT realized from the trading establishments, which is at current prices.

#### **14. Banking and Insurance:**

The state-wise estimates for this activity are prepared separately for (i) Commercial Banks, (ii) Banking department of Reserve Bank of India (RBI), (iii) Non-banking financial companies/corporations, (iv) Post Office Saving Bank, (v) Co-operative Credit Societies, (vi) Life Insurance (from Life Insurance Corporation (LIC) only), (vii) Postal Life Insurance (PLI), (viii) Non-life insurance, (ix) Employees State Insurance (ESI) and (x) Employees Provident Fund Organisation (EPFO). For commercial banks, all-India estimates of CE and rent are distributed among the states in the ratio of number of employees, data on which is received from RBI. Operating Surplus is distributed in the ratio of credit of scheduled commercial banks, data on which is available in the RBI's annual publication 'Banking Statistics'. For the part of Banking Department of RBI, the all-India estimates of CE, rent and surplus are allocated among states in the ratios of wages and salaries, rent & taxes and deposits respectively, data on which is received from the RBI through correspondence.

Estimates of GSDP for Banking and Insurance sector are considered as part of supra-regional sectors and estimates for these sectors are provided by the CSO to the States.

#### **15. Real Estate, Ownership of Dwellings, Business Services and Legal Services:**

The economic activities covered in this sector are (1) Real Estate Services (activities of all types of dealers such as operators, developers and agents connected with real estate), (2) Renting of machinery and equipment without operator and of personal and household goods, (3) Computer and related activities, (4) Accounting, Book Keeping and related activities, (5) Legal Services, (6) Scientific Research and development and (7) Ownership of dwellings (occupied residential houses).

In the 1999-2000 NAS series, research and scientific services have been included under real estate ownership of dwellings and business services sector, whereas the same was part of "Other Services" sector in the old series. The estimates of Value Added Per Worker (VAPW) from NSS 63rd Round and the estimates of workforce from NSS 61st Round, separately for Rural/Urban Private Organised/Un-organised sectors have been used to estimate the Gross Value Added from Real Estate, Renting of Machinery & Equipment without operator and of personal and households goods, computer and related activities of Un-organised sector, Legal Services, Accounting & Book Keeping and Research & Development.

**Real Estate Services:** (activities of all types of dealers such as operators, developers and agents connected with real estate). The estimates of these services have been prepared for the base year by using NSSO's workforce and value added per worker of Enterprise Survey, separately for rural and urban areas. For subsequent years, the estimates of workforce have been worked out by using the inter survey exponential growth rate of quinquennial employment and unemployment surveys as observed between 55th round 1999-2000 and 61st round 2004-05 of NSSO and value added per worker have been moved to subsequent years using the Index of CPI (AL) for rural and CPI (IW) for urban areas.

**Renting of machinery and equipment without operator and of personal and household goods:-** The estimates of these services have been prepared by using NSSO's workforce and value added per worker of Enterprise Survey, separately for rural and urban areas in the base year. For subsequent years, the estimates of workforce have been prepared by using the inter survey exponential growth rate of quinquennial employment and unemployment surveys as observed and value added per worker have been moved to subsequent years by using the Index of CPI(AL) for rural sector and CPI(IW) for urban sector.

**Computer and related activities:** The activities covered under this compilation category are hardware consultancy, software consultancy & supply, data processing, database activities, maintenance & repair of office/accounting/computing machinery and other computer related activities. The estimates of GVA are compiled separately for organised and un-organised sectors.

GVA estimates for organised sector are prepared using NASSCOM data of output of software services and GVA to output ratio obtained from the analysis of available annual reports of software companies on year to year basis. These are allocated to States on the basis of workforce at state level.

**Accounting, Book Keeping and related activities:** The estimates of these services have been prepared by using NSSO workforce and value added per worker of Enterprise Survey, separately for rural and urban areas in the base year. For subsequent years, the estimates of workforce have been worked out by using the inter survey exponential growth rate of quinquennial employment and unemployment surveys as observed and value added per worker, have been moved to subsequent years by using the Index of CPI (AL) for rural sector and CPI (IW) for urban sector.

**Legal Services:** The estimates of these services have been prepared by using NSSO workforce and value added per worker of Enterprise Survey, separately for rural and urban areas in the base year. For subsequent years, the estimates of workforce have been worked out by using the inter survey exponential growth rate and value added per worker have been moved to subsequent years by using the Index of CPIAL for rural sector and CPIIW for urban sector.

**Research and development, market research and public opinion polling, business & management consultancy, architectural, engineering & other technical activities, advertising and business activities n.e.c. excluding auctioning (NIC-98 codes 73, 7413, 7414, 742, 743, 749(-)74991):** This compilation category is obtained by re-grouping the activities under business services and other services. In the 1993-94 series, the estimates of Research & scientific services (NIC-87 code 922) were included under 'other services'. In NIC-98, this activity was classified under code 73, which is under 'business services'. In 1999-2000 series of NAS, the estimates of this activity are included under 'business services' only. Similarly, the GVA estimates of 'press agency activities' falling under NIC-87 code 897 were being compiled, though not exclusively, under the category of 'business services' in 1993-94 series. Presently, this activity is covered under 'news agency

activities', which is classified under NIC-98 code 922. The GVA estimates from this category are included under 'other services' in the new series.

The estimates of GVA for this compilation category have been prepared for organized & un-organised and rural /urban areas for the base year 2004-05 by using VAPW estimates of NSS Enterprise Survey of 2006-07 and the labour input estimates from EUS 2004-05 of NSS 61st Round.

For subsequent years, the estimates of labour input are prepared using the inter-survey growth rates in the workforce. The value added per worker of rural and urban areas are projected to subsequent years with the index of CPI (AL) and CPI (IW) respectively.

**Ownership of Dwellings:** In the production boundary of national accounts, only two categories of services produced by households for own final consumption are included, namely:

- Services of owner-occupied dwellings: Owner-occupiers are deemed to own household unincorporated enterprises that produce housing services for their own consumption; and
- Domestic services produced by employing paid staff: Households are deemed to own household unincorporated enterprises in which they employ paid staff – servants, cooks, gardeners, etc. – to produce services for their own consumption.

The activities mentioned under (a) above are included under 'ownership of dwellings'. The economic activities covered in this sector are ownership of dwellings (occupied residential houses) including imputed value of owner occupied dwellings also. Services rendered by non-residential buildings are considered to be a subsidiary activity of the industries, which occupy the buildings and therefore, are not included in this sector.

In 1999-2000 series, GSDP estimates for the ownership of dwellings were estimated as the gross rental (actual rent paid and imputed rent for owned dwellings) of the residential census houses less the cost of repairs and maintenance. The numbers of 2001 census residential houses in urban and rural areas were projected to get the estimates for the midyear 1999-2000 by applying the average compound growth rate observed between 2001 and 1999. The 2001 census residential houses and rent per house obtained from results of NSS 55th round were used to estimate the gross rental separately for rural and urban sectors. Cost of repair & maintenance of rural and urban sectors were subtracted from the gross rental, to get the GVA estimates for rural and urban sectors.

In 2004-05 series, the old method has been followed in estimating urban dwellings; the data on dwellings and rent per dwelling for urban areas has been taken from the Population Census, 2001 and the results of NSS 61st round on consumer expenditure respectively. However, the methodology for estimating value added from rural dwellings has been changed in the new series to that based on user cost approach, as per latest international guidelines. In the old method, the gross rental is based on rent per house obtained from results of NSS surveys and then cost of repair & maintenance is subtracted from the gross rental, to get the GVA (operating surplus) estimates. In the user cost measure, the net operating surplus is imputed using the opportunity cost principle; i.e., the net operating surplus is imputed on the basis of what owner occupiers could have earned on alternative investments. Then, the dwelling costs are added to the imputed net operating surplus to obtain the imputed rent. These costs include: consumption of fixed capital (CFC) for dwellings, expenditures on ordinary maintenance and repair of dwellings and net premiums on insurance for dwellings. Thus the user cost approach consists of estimating each of the expenditure that owners of dwellings would need to take into account in fixing a market rent if they decided to rent their dwellings to other people rather than to live in them themselves.

These expenditures for estimation at factor cost are: Intermediate consumption, Consumption of fixed capital Net operating surplus.

For subsequent years, estimates of census residential houses are prepared using the inter-censal average compound growth rate for urban areas. The rent per household is moved to subsequent years with the index of house rent sub-group in the CPI (UNME). The GVA of rural part of ownership of dwelling is prepared by CSO and allocates to the states in proportion to respective number of rural houses.

#### **16. Public Administration:**

Gross Value Added (GVA) is estimated by the "Income Approach". The compensation of employees is the only factor income, as operating surplus of administrative departments is treated as nil, being the provider of non-market services. The economic analysis of the budgets of State and local authorities, provides the estimates for administrative departments from which the public administration estimates are derived by making use of Government expenditure under various purpose categories. The estimates of value added in respect of Central Government Administration, being a supra-regional activity, are prepared by the CSO by undertaking the analysis of Central Government Budget documents and are supplied to states. The estimates relating to State Government are prepared by respective states by undertaking an economic analysis of the State Government budget documents. The estimates of income in respect of local authorities are based on the information on compensation of employees obtained by the DESs in respect of the local authorities. These are added to the state-wise estimates of Central Government Administration to obtain the state-wise estimates of public administration.

#### **17. Other Services:**

The economic activities covered under this sector are (i) coaching and tuition (NIC-98 codes 80903 and 80904), (ii) education excluding coaching and tuition (NIC-98 code 80 (-) 80903 (-) 80904), (iii) human health activities including veterinary activities, (iv) sewage and refuse disposal, sanitation activities (nic-98 code 90), (v) activities of membership organisations (+) social work (NIC-98, code 91+ 853), (vi) recreational cultural and sporting activities (NIC-98, code 92), (vii) washing and cleaning of textiles and fur products (NIC-98, code-9301), (viii) hair dressing and other beauty treatment (NIC-98, code 9302) (ix) funeral and related activities (NIC-98 code 9303+9309), (x) private households with employed person (NIC-98 code 95), (xi) custom tailoring (NIC-98, code 18105), and (xii) extra territorial organisations and bodies (NIC-98 code 99).

**Coaching and tuition:** The activities covered under this compilation category are the activities of coaching centers and individuals providing tuitions. The estimates of GVA for coaching and tuition activities have been prepared for the year 2004-05 following the labour input method using the results of NSS 61st round on employment and unemployment and NSS 63rd round on services sectors. For subsequent years, the estimates of labour input are prepared using the inter-survey growth rates in the workforce. The value added per worker of rural and urban areas are projected to subsequent years with the index of CPI (AL) and CPI (IW) respectively.

**Education excluding coaching and tuition:** The activities covered under this compilation category are the activities of private education institutions, excluding those of coaching centers and individuals providing tuitions. The GVA for public sector is taken to be equivalent to the budget expenditure on salaries and wages of teaching and non-teaching staff of educational services. The estimates of private Corporate (proxy for recognized institutions) and unorganized sector ( proxy for un-recognized institutions) have been prepared following the labour input method using the data on workforce from 61st round and the estimated VAPW from the NSS 63rd round. For subsequent years, the estimates of labour input are prepared using the inter-survey growth rates in the workforce. The value

added per worker of rural and urban areas are projected to subsequent years with the index of CPI (AL) and CPI (IW) respectively.

**Human health activities and veterinary activities:** The activities covered under this compilation category are the activities of human health and veterinary services. The GVA for the public sector has been taken to be equivalent to the budget expenditure on salaries and wages of medical personnel obtained from the analysis of the budget documents. The GVA for private corporate sector and unorganized sector have been estimated using work force estimates from NSSO, 61st round and VAPW estimated from the results of NSS 63rd round survey on services sectors. For subsequent years, the estimates of labour input are prepared using the inter-survey growth rates in the workforce. The value added per worker of rural and urban areas are projected to subsequent years with the index of CPI (AL) and CPI (IW) respectively.

**Sewage and refuse disposal, sanitation activities:** The activities covered in this category are the sewage and refuse disposal, sanitation and similar activities. The GVA estimates for these activities have been prepared separately for public, private corporate and un-organised sectors. Public sector estimates are derived as the sum of budget expenditure on salaries and wages of activities covered under government. The GVA for private corporate sector and unorganized sector have been estimated using work force estimates from NSSO, 61st round and VAPW estimated from the results of NSS 63rd round survey on services sectors. For subsequent years, the estimates of labour input are prepared using the inter-survey growth rates in the workforce. The value added per worker of rural and urban areas are projected to subsequent years with the index of CPI (AL) and CPI (IW) respectively.

**Activities of membership organisations and social work:** This sector includes the activities of associations of writers, painters, lawyers, doctors, journalists and other similar organizations, activities of trade unions, interested chiefly in the representation of their views concerning their work situation, activities of other membership organizations, activities of religious organisations, activities of political organizations, activities of other membership organizations, social work with accommodation, and social work without accommodation.

The GVA for private corporate sector and unorganized sector have been estimated using work force estimates from NSSO, 61st round and VAPW estimated from the results of NSS 63rd round survey on services sectors. For subsequent years, the estimates of labour input are prepared using the inter-survey growth rates in the workforce. The value added per worker of rural and urban areas are projected to subsequent years with the index of CPI (AL) and CPI (IW) respectively.

**Recreational, cultural and sporting activities:** The activities covered in this category are recreational, cultural and sporting activities. The estimates of GVA for this activity have been compiled for the base year 2004-05, separately for public, private corporate and un-organised segments. The estimates of GVA for the Public Sector are from the annual reports of PRASHAR BHARTI by CSO and allocates to States. The GVA for private corporate sector and unorganized sector have been estimated using work force estimates from NSSO, 61st round and VAPW estimated from the results of NSS 63rd round survey on services sectors. For subsequent years, the estimates of labour input are prepared using the inter-survey growth rates in the workforce. The value added per worker of rural and urban areas are projected to subsequent years with the index of CPI (AL) and CPI (IW) respectively.

**Washing and cleaning of textiles and fur products:** The activities covered in this category are washing and dry cleaning of textile and fur products. The GVA for private corporate sector and unorganized sector have been estimated using work force estimates from NSSO, 61st round and VAPW estimated from the results of NSS 63rd round survey on services

sectors. For subsequent years, the estimates of labour input are prepared using the inter-survey growth rates in the workforce. The value added per worker of rural and urban areas are projected to subsequent years with the index of CPI (AL) and CPI (IW) respectively.

**Hair dressing and other beauty treatment:** The activities covered in this category are hairdressing and other beauty treatment. The GVA for unorganized sector have been estimated using work force estimates from NSSO, 61st round and VAPW estimated from the results of NSS 63rd round survey on services sectors. For subsequent years, the estimates of labour input are prepared using the inter-survey growth rates in the workforce. The value added per worker of rural and urban areas are projected to subsequent years with the index of CPI (AL) and CPI (IW) respectively.

**Custom tailoring:** The GVA for private corporate and unorganized sector have been estimated using work force estimates from NSSO, 61st round and extrapolated VAPW of NSS 63rd round survey on services sectors. For subsequent years, the estimates of labour input are prepared using the inter-survey growth rates in the workforce. The value added per worker of rural and urban areas are projected to subsequent years with the index of CPI (AL) and CPI (IW) respectively.

**Funeral and related activities:** The activities covered in this category are funeral and related activities (NIC-98, code 9303) and other service activities, n.e.c. (NIC-98, code 9309). The GVA for private corporate and unorganized sector have been estimated using work force estimates from NSSO, 61st round and extrapolated VAPW of NSS 63rd round survey on services sectors. For subsequent years, the estimates of labour input are prepared using the inter-survey growth rates in the workforce. The value added per worker of rural and urban areas are projected to subsequent years with the index of CPI (AL) and CPI (IW) respectively.

**Private households with employed person:** Data on private households with employed persons was not collected in the NSS 63rd round survey on services sectors, as it was not found to be feasible to identify such households as enterprises. The value added generated by this activity relates to wages paid to 'employed persons' by the households. Therefore, the VAPW for 2004-05 was estimated on the basis of wage data collected in the NSS 61st round Employment Unemployment Survey. The total weekly earnings of the workers falling under this category were divided by the number of workers to arrive at weekly wages/salaries. The GVA estimates in respect of these services were compiled using average weekly wage per unit of labour input (adjusted for annual wages), separately for rural and urban areas in the base year. For subsequent years, the estimates of labour input are prepared using the inter-survey growth rates in the workforce. The value added per worker of rural and urban areas are projected to subsequent years with the index of CPI (AL) and CPI (IW) respectively.

**Extra territorial organisations and bodies:** The activities covered in this category (NIC-98, Code 99) are extra territorial organisations and bodies including the activities of international organizations such as United Nations and its agencies, regional bodies etc., and of International Monetary Fund, World Bank, European Commission, etc. The estimates of GVA of these services in the 2004-05 series were prepared using the results of NSS 61st round workforce and thrice the VAPW of Public Administration and Defence (as a proxy), separately for rural and urban areas. For subsequent years, the estimates of labour input are prepared using the inter-survey growth rates in the workforce. The value added per worker of rural and urban areas are projected to subsequent years with the index of CPI (AL) and CPI (IW) respectively.

**SOURCES AND ASSUMPTIONS / METHODOLOGY RECOMMENDED BY C.S.O FOR THE  
NEW SERIES OF GSDP WITH BASE YEAR 2004-05**

Item	Source of data	Assumption / method of estimation	
		At Current Prices	At Constant (2004-05) Prices
<b>1. Agriculture, including livestock</b>			
(a) Value of output – (1) Major and minor crops			
(i) Major crops (25) (paddy, wheat, jowar, bajra, maize, ragi, barley, small millets, gram, tur, other kharif pulses, other rabi pulses, groundnut, sesamum, rapeseed & mustard, linseed, castorseed, safflower, nigerseed, soyabean, sunflower, cotton, jute, mesta and sugarcane)	Directorate of Economics and Statistics, Ministry of Agriculture (DES Ag) for production State Directorates of Economics (DES) and Statistics for prices	Value of output = production * current year price	Value of output = production * base year price
(ii) Minor crops (17) (potato, onion, banana, tapioca, sweet potato, pepper, ginger, garlic, chillies, turmeric, arecanut, coriander, cardamom, sunhemp, tobacco, guarseed and coconut).	Directorate of Economics and Statistics, Ministry of Agriculture (DES Ag) for production State Directorates of Economics (DES) and Statistics for prices	Value of output = production * current year price	Value of output = production * base year price
(iii) small millets (includes korra, vargu, samai, cheena, kodan and kutki, sawan, trumba, kangani, kudroo, sewal, phoolan, grim, navane, harake, save, bargu, sanva, rala, kakun, basara, bhadli, banti, vari, buck wheat)	DESAg and State DESs for production	Value of output = production * current year price Price= 75% of weighted average price of jowar, bajra, barley, maize and ragi	Value of output = production * base year price Price= 75% of weighted average price of jowar, bajra, barley, maize and ragi
(iv) other pulses	DESAg and State DESs for area (ha) under the crops and production.	Value of output = production * current year price Price=0.85* weighted average price of arhar, urad, moong, masur and horsegram	Value of output = production * base year price Price=0.85* weighted average price of arhar, urad, moong, masur and horsegram

Item	Source of data	Assumption / method of estimation	
		At Current Prices	At Constant (2004-05) Prices
<b>(2) Commercial Crops</b>			
(i) tea	Tea Board for production of processed tea State DESs for prices	Value of output = production * current year price Production of raw tea = processed tea / 0.225	Same as in current prices, price adopted is the base year price
(ii) coffee	Coffee Board for production and prices	Value of output = production * current year price	Value of output = production * base year price
(iii) rubber	Rubber Board for production State DESs for prices	Value of output = production * current year price	Value of output = production * base year price
(iv) cashew nuts and cocoa	Directorate of Cashewnut and Coca Development for production and prices	Value of output = production * current year price	Value of output = production * base year price
(v) horticulture crops (other than those covered in the minor crops (banana, onion, potato, sweet potato and tapioca))	National Horticulture Board (NHB) for production State DESs for prices	Value of output = production * current year price	Value of output = production * base year price
(vi) opium	Central Bureau of Narcotics for production and prices	Value of output = production * current year price	Value of output = production * base year price
(vii) arecanut	Directorate of Arecanut and Spices Development for production and prices	Value of output = production * current year price	Value of output = production * base year price
(viii) flowers (separately for cut flowers and sticks)	National Horticulture Board (NHB) for production State DESs for prices	Value of output = production * current year price	Value of output = production * base year price
<b>(3) Miscellaneous Crops</b>			
(i) other cereals	DESAG and State DESs for area (ha) under the crops	Value of output = area * value per hectare Value per hectare = weighted average of value per hectare of the crops, jowar, bajra, barley, maize and ragi	Value of output = area * value per hectare Value per hectare = weighted average of value per hectare of the crops, the crops, jowar, bajra, barley, maize and ragi in the base year

Item	Source of data	Assumption / method of estimation	
		At Current Prices	At Constant (2004-05) Prices
(ii) other sugars (excluding palmyra)	DESAG and State DESs for area (ha) under the crops	Value of output = area * value per hectare Value per hectare = 0.90* value per hectare of the crop, sugarcane	Value of output = area * value per hectare Value per hectare = 0.90* value per hectare of the crop, sugarcane in base year
(iii) other oilseeds (excluding taramira)	DESAG and State DESs for area (ha) under the crops	Value of output = area * value per hectare Value per hectare = 0.85* weighted average of value per hectare of the crops, linseed, sesamum, castorseed, niger seed and safflower	Value of output = area * value per hectare Value per hectare = 0.85* weighted average of value per hectare of the crops, linseed, sesamum, castorseed, niger seed and safflower in the base year
(iv) other fibers	DESAG and State DESs for area (ha) under the crops	Value of output = area * value per hectare Value per hectare = 0.90* weighted average of value per hectare of the crops, sanhemp and mesta	Value of output = area * value per hectare Value per hectare = 0.90* weighted average of value per hectare of the crops, sanhemp and mesta in the base year
(v) other drugs and narcotics	DESAG and State DESs for area (ha) under the crops	Value of output = area * value per hectare Value per hectare = 0.90* weighted average of value per hectare of the crops, opium (Madhya Pradesh, Rajasthan and Uttar Pradesh) and tobacco stem (all other states)	Value of output = area * value per hectare Value per hectare = 0.90* weighted average of value per hectare of the crops, opium (Madhya Pradesh, Rajasthan and Uttar Pradesh) and tobacco (all other states) in the base year
(vi) other condiments and spices	DESAG and State DESs for area (ha) under the crops	Value of output = area * value per hectare Value per hectare = 0.90* weighted average of value per hectare of the crops, dry chillies, turmeric and garlic	Value of output = area * value per hectare Value per hectare = 0.90* weighted average of value per hectare of the crops, dry chillies, dry ginger, turmeric and garlic in the base year

Item	Source of data	Assumption / method of estimation	
		At Current Prices	At Constant (2004-05) Prices
(vii) other fruits and vegetables	NHB for production	Value of output = production * current year price Price = weighted average price of all fruits and vegetable crops for which separate data is available	Value of output = production * base year price Price = weighted average base year price of all fruits and vegetable crops for which separate data is available
(ix) Tobacco stem	DESAg and State DESs for area (ha) under the crops	Production = some % of tobacco production Price = 50% of the price of tobacco Value of output = production * current year price	Production = some % of tobacco production Price = 50% of the price of tobacco in the base year Value of output = production * base year price
(x) Toddy	NSS Report of 61st round on Consumption of some important commodities in India (July 2004-June 2005) Census data on rural and urban population	Value of output = estimate at constant price * WPI (non-food articles)	Value of output = value consumption of toddy per annum per person in the base year * current population
(xi) fodder	DESAg and State DESs for area (ha) under fodder crops (land use statistics) State DESs for prices	Value of output = production * current year price Production = irrigated area under fodder crops * 50MT + un irrigated area under fodder crops * 25MT	Value of output = production * base year price Production = irrigated area under fodder crops * 50MT + un irrigated area under fodder crops * 25MT
(xii) grass	DESAg and State DESs for area (ha) under the crops State DESs for prices	Value of output = production * current year price Production = total area (4* area under permanent pastures + 1* miscellaneous tree crops + 2* culturable waste + 2* fallow lands + 1* net area sown) * fixed yield rates (statewise) (based on NSS results)	Value of output = production * base year price
(xiii) mulberry	State DESs and State DESs for area (ha) and value per hectare	Value of output = area * Value per hectare	Value of output = area * Value per hectare in the base year

Item	Source of data	Assumption / method of estimation	
		At Current Prices	At Constant (2004-05) Prices
(xiv) miscellaneous food and nonfood crops	State DESs and State DESs for area (ha) and value per hectare	Value of output = area * Value per hectare	Value of output = area * Value per hectare in the base year
<b>(4) By products</b>			
(i) paddy straw (ii) wheat straw (iii) bajra straw (iv) barley straw (v) jowar straw (vi) maize straw (vii) ragi straw (viii) gram straw (ix) moong straw (x) arhar stick (xi) urad straw (xii) groundnut straw (xiii) cotton sticks (xiv) jute sticks (xv) sugarcane trash (xvi) poppy seed	DESAg and State DESs for area (ha) cost of cultivation studies for value per hectare	Value of output = area * Value per hectare	Value of output = area * Value per hectare in the base year
<b>(5) Other products</b>			
(i) Gur	State DESs for prices	Value of output = production * current year price Production of gur = about 0.1 * sugarcane used for gur making (derived as a residual from total sugarcane production of that part which is used for chewing, for seed, crushed by factories and in unregistered manufacturing, estimates made available by the Dte. of Sugar, Ministry of Consumer Affairs, Food and Public Distribution)	Value of output = production * base year price
(ii) Bagasse	State DESs for prices	Value of output = production * current year price Production of bagasse = 3.5% * sugarcane used for gur making	Value of output = production * base year price
(iii) Kitchen garden	Results of NSSO survey on landholdings for area (ha) under kitchen garden	Value of output = 0.21% of net sown area * value of output per hectare of other fruits and vegetables	Value of output = area under kitchen garden * value of output per hectare of other fruits and vegetables, in the base year

Item	Source of data	Assumption / method of estimation	
		At Current Prices	At Constant (2004-05) Prices
<b>(6) Livestock products</b>			
(i) milk, eggs and wool	Integrated Sample Survey (ISS) conducted by the Department of Animal Husbandry and Dairying (DAH) for production State DESs for prices	Value of output = production * current year price	Value of output = production * base year price
(ii) Camel milk	Yield rate supplied by State AHD	Value of output = value of yield per camel in the current year * population	Value of output = value of yield per camel in the base year * population
(iii) Goat milk, buffalo milk and duck eggs not estimated in some states by ISS	ISS and State AHD	Value of output = production * current year price Production = annual yield per animal / duck * Population	Value of output = production * base year price
(ii) meat (unregistered meat if not included is to be estimated on the basis of the rates prevalent in the neighboring states)	State DESs for production and prices	Value of output = production (after adjusting for the quantity produced by the manufacturing sector) * current year price	Value of output = production (after adjusting for the quantity produced by the manufacturing sector) * base year price
(iii) fats	State DESs for no. of animals slaughtered and prices Directorate of Marketing Inspection (DMI) reports for mortality rates, National Accounts Division (NAD) for rates and ratios	Value of output = no. of animals slaughtered and fallen * yield rate * current year price	Value of output = no. of animals slaughtered and fallen * yield rate * base year price
(iv) heads and legs	State DESs for no. of animals slaughtered and fallen and prices National Accounts Division (NAD) for rates and ratios	Value of output = no. of animals slaughtered and fallen * yield rate * current year price	Value of output = no. of animals slaughtered and fallen * yield rate * base year price

Item	Source of data	Assumption / method of estimation	
		At Current Prices	At Constant (2004-05) Prices
(v) edible offals and glands	State DESs for no. of animals slaughtered and fallen and prices NAD for rates and ratios	Value of output = no. of animals slaughtered and fallen (cattle, buffalo, goats, sheep and pigs) * yield rate * current year price	Value of output = no. of animals slaughtered and fallen * yield rate * base year price
(vi) poultry meat	Indian livestock census for population State DESs for prices	Value of output is estimated separately for four components (a) chicken and ducklings killed, (b) adult fowls killed, (c) adult ducks killed and (d) other poultry killed multiplied by the respective prices <b>(a) chickens &amp; ducklings killed = total poultry of current year</b> (chicks survived + 50% of hens & cock population + 50% of ducks & drakes population + population of chickens, ducklings, 37.5% of other poultry) – <b>total poultry of next year</b> (population of hens + cocks + ducks + drakes + chickens + other poultry), <b>where</b> chicks survived = 1/3 rd of eggs kept for hatching (eggs kept for hatching = fixed ratio* total egg production) <b>(b) adult fowls killed</b> = 50% of population of hens & cocks <b>(c) adult ducks killed</b> = 50% of population of ducks & drakes <b>(d) other poultry</b> = 37.5% of other poultry	Same procedure as adopted for the current price estimates, but the prices used are the respective base year prices
(vii) meat by products – guts, blood, oesophagus, useless meat, bones, horns, hoofs, tail stumps	States DESs for no. of animals slaughtered and prices (NAD) for rates and ratios States DESs for no. of animals slaughtered & fallen and prices (NAD) for rates and ratios	Value of output = % value of meat and meat products (13.2%, 13.3%, 2.4%, 2.5%, and 5% respectively for cattle, buffalo, goats, sheep and pigs)	Value of output = % value of meat and meat products (13.2%, 13.3%, 2.4%, 2.5%, and 5% respectively for cattle, buffalo, goats, sheep and pigs)

Item	Source of data	Assumption / method of estimation	
		At Current Prices	At Constant (2004-05) Prices
(vii) cattle / buffalo hides	States DESs for no. of animals slaughtered & fallen and prices	Value of output = no. of animals slaughtered and fallen (cattle / buffalo) * current year price	Value of output = no. of animals slaughtered and fallen (cattle, buffalo) * base year price
(ix) goat / sheep skin	States DESs for no. of animals slaughtered & fallen and prices	Value of output = no. of animals slaughtered and fallen (goat / sheep) * current year price	Value of output = no. of animals slaughtered and fallen (goat / sheep) * base year Price
(x) camel / goat / pig hair	Indian Livestock Census for population DMI reports and NAD for yield rates State DESs for prices	Value of output = yield rate * population of camel / goat / pig * current year price	Value of output = yield rate * population of camel / goat / pig * base year price
(xi) dung (a) dung cakes (b) dung manure (c) dung used for other purposes	ISS for yield rates of dung and utilization rates Indian Livestock Census for population State DESs for prices and conversion rates	Quantity output of dung = population of cattle and buffalo * yield rate <b>(a) dung cakes</b> Value of output = 0.4 * utilization rate for estimating dung used for making cakes * dung production * current year price <b>(b) dung manure</b> Value of output = utilization rate for estimating dung used for manure purpose * dung production * current year price <b>(c) dung used for other purposes</b> Value of output = utilization rate for estimating dung used for other purposes * dung production * current year price	Same procedure as adopted for the current price estimates, but the prices used are the respective base year prices
(xii) other products – silk-ere, tassar, muga and honey and bee wax	Central silk board for production and prices of silk and KVIC for production and prices of honey	Value of output = quantity * price	Value of output = quantity * base year price
(xiii) increment in livestock	Indian Livestock Census for population State DESs for prices	Value of output = additions to livestock population during the year * price	Value of output = additions to livestock population during the year * base year price

Item	Source of data	Assumption / method of estimation	
		At Current Prices	At Constant (2004-05) Prices
<b>(7) Irrigation System</b>			
(i) operation of irrigation system	Budget documents of state governments	Gross value added = compensation of employees + operating surplus + consumption of fixed capital	Benchmark estimates are moved with index of area irrigated
<b>(b) Inputs</b>			
(1) seed (i) paddy, wheat, jowar, bajra, barley, maize, ragi, small millets, gram, arhar, urad, moong, masoor, linseed, sesamum, Linseed Sesamum, Groundnut, Rapseed & Mustard, Castor, Sugarcane, Black pepper, Turmeric, Potato	DESAg through cost of cultivation studies State DESS for prices	Value of inputs = seed rate * area * current year price	Value of inputs = seed rate * area * base year price
(ii) other cereals, other condiments & spices, coconut, miscellaneous food crops	DMI studies for value of seed inputs per hectare Ministry of Industry for WPI	Value of inputs = area * value of seed inputs per hectare of Base year estimate * relevant wholesale price index (WPI)	Value of inputs = area * value of seed inputs per hectare of Base year estimate
(iii) misc. non-food crops, tapioca, fodder, guar seed, cotton, dry chillies, other vegetables & dry ginger	State DESS for seed rates	Value of inputs = seed rate * area * current year price	Value of inputs = seed rate * area * base year price
(2) pesticides	Pesticides Association of India for despatches Dte. Of Quarantine & Plant Protection for state-wise consumption	Total despatches at current year prices distributed to various states on the basis of state-wise consumption figures	Total despatches at base year prices distributed to various states on the basis of state-wise consumption figures
(3) repair and maintenance	All India Debt and Investment Survey (AIDIS), 2002-03	Benchmark estimates moved with the estimates of capital stock of farm business	Benchmark estimates prepared using AIDIS, 2002-03 results
(4) operational costs for livestock	State DESS	0.25 * value of output of poultry meat, silk, wool, hides and increment in livestock	0.25 * value of output of poultry meat, silk, wool, hides and increment in livestock at base year prices

Item	Source of data	Assumption / method of estimation	
		At Current Prices	At Constant (2004-05) Prices
(5) electricity	Central Electricity Authority for consumption of electricity and prices	Value of electricity inputs = electricity consumption * current year price	Value of electricity inputs = electricity consumption * base year price
(6) chemical fertilizers	Fertilizer Association of India for dispatches and prices	Value of inputs = quantity consumed * current year price	Value of inputs = quantity consumed * base year price
(7) diesel oil	DESag for consumption (in value terms) per diesel engine and per tractor State DESs for no. of diesel engines and tractors	Value of inputs = no. of diesel engines / tractors * consumption in value terms per diesel engine/ tractor in the current year	Value of inputs = no. of diesel engines / tractors * consumption in value terms per diesel engine/ tractor in the base year
(8) irrigation charges	State DESs for irrigation charges	Compiled from the Budget documents	Base year estimate moved with area irrigated through government sources
(9) market charges for crops	Benchmark survey conducted by the DESag for determining the market charges	Market charges = 0.0322 * value of output at current prices (which is derived from the survey)	Market charges = 0.0322 * value of output at base year prices (which is derived from the survey)
(10) feed of livestock (i) roughages	Output estimates of certain crops	Value of roughages = value of output of fodder, grass, cane trash + 0.95 * (value of output of straw and stalks), at current year prices	Value of output of roughages = value of output of fodder, grass, cane trash + 0.95 * (value of output of straw and stalks), at base year prices
(ii) concentrates	Indian Livestock Census for prices CCS results on consumption rates	Value of concentrates = Annual Consumption rates of different categories of animals of different items * Weighted average price of different items Rates as in Constant Prices moved with price indices.	Value of concentrates = Annual Consumption rates of different categories of animals * population of these categories. Cattle/ Buffalo: ₹ 685.26 per year Goats, sheep and pig: ₹ 66 per year. Poultry ₹ 121.38 per year.

Item	Source of data	Assumption / method of estimation	
		At Current Prices	At Constant (2004-05) Prices
<b>2. Forestry</b>			
Value of output (1) Industrial wood (i) recorded	State forest departments (SFD) for production State DESs for prices	Value of output = production * current year price	Value of output = production * base year price
(ii) unrecorded	Expert Committee	Value of output = 0.1 * value of output of recorded production	Value of output = 0.1 * value of output of recorded production
(iii) Trees outside forest	FSI	Value = production (using growing stocks in forest given by FSI) * Price (weighted average price of industrial wood at current price)	Value = production (using growing stocks in forest given by FSI) * Price (weighted average price of industrial wood at base price)
(2) Fuelwood	NSS Consumer Expenditure Surveys, 61st round for rates of consumption of firewood & chips by the households, moved for the current year Office of the Registrar General of India for population projections Enterprise Survey results for consumption of firewood & chips by the industries State DESs for prices	Total production of fuel wood = rates of consumption per person * population (separately rural and urban) – agricultural by products used as fuel wood (output of certain by products in the agriculture sector) Total value of output = 1.06 * production of fuel wood estimated above * current year price (the addition of 6 per cent is to account for the consumption of fuel wood by non-households, namely, the enterprises, which is derived from the data of enterprise surveys for the benchmark year)	Same procedure as adopted for the current price estimates, but the prices used are the respective base year prices

Item	Source of data	Assumption / method of estimation	
		At Current Prices	At Constant (2004-05) Prices
(3) Non traditional Forest Products (i) minor forest products (ii) Fodder	SFDs for value of output Ministry of Industry for Wholesale Price Index (WPI) CCS	Value of output estimates are directly furnished by the SFDs Value directly from feed of livestock	Value of output at current prices deflated by the relevant WPI Value directly from feed of livestock
Inputs of forestry sector	Standard rate computed from state budgets	15.6% of total value of output	15.6% of total value of output
<b>3. Fishing</b>			
Value of output (1) marine fish, inland fish and prawns	State Fisheries departments for production and disposals State DESS for prices	Value of output = fish sold in raw form * prices (separately for marine, inland and prawns) + fish sold as salted and dried * prices + frozen fish * price	Same procedure as adopted for the current price estimates, but the prices used are the respective base year prices
(2) subsistence fish	State DESS and the state fisheries departments	Value of output = 0.125 * production of inland fish * price (for the states for which the production of subsistence fish is not included in the production of inland fish)	Value of output = 0.125 * production of inland fish * base year price
Inputs (1) marine fish and prawns	State DESS and the state fisheries departments	Value of inputs = 0.225 * value of output of total production of marine fish and prawns	Value of inputs = 0.225 * value of output of total production of marine fish and prawns at base year prices
(2) inland fish	State DESS and the state fisheries departments	Value of inputs = 0.1 * value of output of total production of inland fish	Value of inputs = 0.1 * value of output of total production of inland fish at base year prices
(3) fish salting	State DESS and the state fisheries departments	Value of inputs = 0.01 * value of output of salted fish	Value of inputs = 0.01 * value of output of salted fish at base year prices
<b>4. Mining &amp; Quarrying</b>			
(1) coal	Annual Reports of Coal India Ltd. & its subsidiaries for value of Output Inputs & GVA Coal Directory of India published by office of	Value of output input and GVA of Public is determined by analyzing the annual reports Share of public sector in total production is worked out. Utilizing the said share public sector estimates are	Value of output = production * base year price (derived from the base year total value of output divided by total prodn.) Value of material inputs is derived using the input-output

Item	Source of data	Assumption / method of estimation	
		At Current Prices	At Constant (2004-05) Prices
	Coal Controller	duly adjusted to arrive at total estimates	ratio at current prices Input rates pertaining to public sector are utilized.
(2) lignite	Indian Bureau of Mines for production and prices Neyveli Lignite Corporation for inputs	Value of output = production * current year price Value of material inputs are directly available	Value of output = production * base year price Value of material inputs are directly available
(3) crude petroleum and natural gas	ONGC and OIL for production, prices and inputs	Value of output = production * current year price Value of material inputs are directly available	Value of output = production * base year price Value of material inputs are directly available
(4) other major minerals	Indian Bureau of Mines for production, prices and inputs (except salt) Salt Commissioner's office	Value of output = production * current year price Input rates are directly available from IBM In respect of salt input rates of minor minerals are used	Value of output = production * base year price Input rates are directly available from IBM
(5) minor minerals	State Geological Departments for value of output IBM for input rates	Value of output estimates are directly available at current year price Input rates are directly available	Value of output is obtained using the ratio of value of output of total non metallic minerals at constant to current prices Input rates are directly available
<b>5. Manufacturing</b>			
<b>(i) registered</b>	CSO for Annual Survey of Industries (ASI) CSO for Index of Industrial Production (IIP) Ministry of defence for the defence production Centre/ State budgets for railway workshops Annual Reports of Security, Printing and Minting Corporation of India Ltd. Ministry of Industry for	Value of output material inputs and GVA are obtained from the results of ASI The IIP and WPI based on NIC-98 are used to arrive at quick estimates Data of Input and output of Defence production units are utilized to obtain GVA Government Budget Analysis Value Added from mints and security printing presses obtained by analysis of SPMCIL annual accounts.	Current price estimates are deflated with the relevant WPI

Item	Source of data	Assumption / method of estimation	
		At Current Prices	At Constant (2004-05) Prices
	the WPI		
<b>(ii) unregistered</b>	Fourth All India Census of Micro, Small & Medium Enterprises 2006-07 conducted by the Office of the Development Commissioner for Micro, Small & Medium (MSME) for value added per worker (VAPW) of MSME units Survey on unorganized manufacturing sector conducted by the NSSO, 2005-06 for VAPW NSS / Population Census for Workforce (WF) estimates. CSO for the IIP Ministry of Industry for the WPI	Benchmark estimates of GDP for the year 200405 = value added per worker (VAPW) * number of workers (separately for compilation category level of NIC for the segments of MSME and non-MSME, which comprises of directory manufacturing establishments, non-directory manufacturing establishments and own-account manufacturing enterprises) The benchmark industry wise estimates are moved with the relevant IIP and the WPI	The benchmark industry wise estimates are moved with the relevant IIP
<b>6. Electricity, gas and water supply</b>			

Item	Source of data	Assumption / method of estimation	
		At Current Prices	At Constant (2004-05) Prices
(1) (a) electricity (excluding wind power)	Annual Reports of state Electricity Boards for output and inputs Annual Reports of electricity generating private companies for output and inputs	Both value of output and value of material inputs are available	Base year estimate moved with the index of quantum sales of electricity
1 (b) Electricity (Wind Energy)	Directorate of Economics & Statistics	Both quantity and value of power generated is available. Approximated value of input of per MW is also available.	Base year estimate moved with the index of quantum of wind power generated.
(2) gobar gas	Ministry of Non-conventional Energy for no. of bio gas plants Khadi & Village Industries Commission (KVIC) for value of production	Value of production is directly treated as value added. Value of material inputs (dung) is assumed to be equal to the value of after use by-product (dung manure)	Base year estimate moved with the index of no. of bio gas plants
(3) gas	Gas Authority of India Ltd. For output and inputs Indraprastha Gas Ltd.	Both value of output and value of material inputs are available	Current price estimates are deflated with the index of price of gas
(4) water -public	Budget documents of centre and states for data on salaries and wages	Value added = salaries and wages + consumption of fixed capital	Current price estimates are deflated with the CPI (IW)
(5) water -private	Data from municipalities for data on salaries and wages	Value added = workforce * salaries and wages per worker	Current price estimates are deflated with the CPI (IW)
<b>7. Construction</b> Public Sector	State Budget documents, NDCU Annual Reports and Information from CSO	Railways, Communication, Central Government departmental commercial undertakings GVO supplied by CSO. Regarding State Government departmental commercial undertakings and State administration expenditure taken from state Government budget documents and	Deflated by Cost of Pucca Construction Index.

Item	Source of data	Assumption / method of estimation	
		At Current Prices	At Constant (2004-05) Prices
<b>House hold sector</b> <ul style="list-style-type: none"> <li>◆ Rural residential buildings (RRB) (new construction outlays)</li> <li>◆ RRB-repair and maintenance (R&amp;M)</li> <li>◆ Urban residential buildings (URB) (new construction outlays)</li> <li>◆ URB – R &amp; M</li> <li>◆ R/U non residential building other construction works (new construction outlays)</li> <li>◆ R/U Non-residential building other construction works R&amp;M</li> <li>◆ Plantations in household sector</li> </ul>	<ul style="list-style-type: none"> <li>◆ AIDIS, 2002-03 for investment in rural and urban residential buildings</li> <li>◆ Population Census for number of dwellings</li> <li>◆ Commodity Boards for plantation crops, NHB, NABARD publication for cost structures,</li> <li>◆ NSSO 58<sup>th</sup> Round Results Report No 488 "Housing Conditions in India"</li> </ul>	<p>annual accounts of state Non-departmental commercial undertakings.</p> <p>The state wise estimates of new and repairs &amp; maintenance in respect of rural and urban residential buildings of AIDIS are moved to latter years with the help of growth rate given by CSO. Item	Source of data	Assumption / method of estimation	
		At Current Prices	At Constant (2004-05) Prices
	(NDCU) for output and inputs.		
<b>(2) Trade – Private Organized sector</b> (i) private corporate units dealing in wholesale and retail trade (except motor vehicles) + auctioning activity	RBI's study of the finances of a sample of companies for value added Ministry of Corporate Affairs	Value added from sample companies multiplied by the ratio of total paid-up capital to the paid up capital of the sample companies.	Current Price estimates deflated by Implicit deflator of GDP (GDP excluding the GDP of trade, hotels and restaurants)
<b>(2) Trade – Private Organized sector</b> (ii) trading co-operative units engaged in wholesale and retail trade (except motor vehicles) + auctioning activity	NABARD's publication, 'Statistical Statements Relating to Co-operative movement in India' for value added Ministry of Industry for WPI for various sub-groups	Direct data from the publication	Base year estimate is moved with the help of index of deflated sales of corporate sector (sale deflated by the WPI of manufactured products and non-food articles).
<b>(2) Trade – Private Organized sector</b> (iii) Maintenance and repair of motor vehicles	RBI's study of the finances of a sample of companies for value added Ministry of Corporate Affairs for the total paid-up capital DGET report Ministry of industry for WPI	Base year: GVA (VAPW * LI) For other years, base year estimates extrapolated with growth trend observed in private corporate sector.	Current price estimates of GVA are deflated by wholesale price index
<b>(2) Trade – Private Organized sector</b> (iv) Repair of personal household goods	RBI's study of the finances of a sample of companies for value added Ministry of Corporate Affairs for the total paid-	Constant price estimates are inflated with CPI (IW)	Base year GVA: (VAPW *LI), VAPW estimated from private corporate sector and LI from DGET, is moved with growth in Labour Input.

Item	Source of data	Assumption / method of estimation	
		At Current Prices	At Constant (2004-05) Prices
	up capital DGET report Labour Bureau for CPI-IW		
<b>(3) Trade – Private Unorganized sector</b> (i) wholesale trade (except motor vehicles ) + auctioning activity (ii) Retail trade except motor vehicles (iii) Repair of personal household goods (iv) Maintenance and repair of motor vehicles (v) Sale of motor vehicles	Informal sector survey, NSS 55th round 1999-2000 for VAPW EUS, NSS 61st round 200405 Population Census 2001 for WF estimates Gross Value of output from commodity producing sectors both at current and constant prices Trade and transport margin from IOTT 2003-04 Agricultural Statistics at Glance, Ministry of Agriculture and DMI.	Base year GVA (VAPW * WF) is moved with the index of gross trading income of commodity producing sectors evaluated at current prices.	Base year estimate is moved with the index of gross trading income of commodity producing sectors evaluated at constant prices.
<b>9. Hotels and Restaurants</b>			
<b>(1) Hotels and restaurants -public sector</b>	Budget documents for DCUs for value of output and inputs Annual reports of the NDCU for value of output and inputs	Both value of output and value of material inputs are available <b>Supplied by CSO</b>	Base year estimate is moved with the quantum index (obtained on the basis of purchase and sales of public sector trading companies).
<b>(2) Hotels and restaurants-private organized</b>	RBI's study of the finances of a sample of companies for GVA Ministry of Corporate Affairs for the total paid-up capital	Base Year Value added from sample companies multiplied by the ratio of total paid-up capital to the paid up capital of the sample companies. Subsequently moved through RBI sample companies growth in value added in hotels sector.	Base year estimate GVA are deflated by wholesale price index.

Item	Source of data	Assumption / method of estimation	
		At Current Prices	At Constant (2004-05) Prices
(3) <b>Private unorganized</b> (i) Hotels (ii) Restaurants	Enterprise survey, NSS 57th round 2001-02 for VAPW EUS, NSS 61st round 200405 Population Census 2001 for WF estimates. Gross Value of output from commodity producing sectors both at current and constant prices Trade and Transport margins from IOTT 200304 'Agricultural Statistics at Glance', Ministry of Agriculture and DMI for marketable surplus ratios	Base year estimate (VAPW * WF) is moved with the index of gross trading income of commodity producing sectors, at current prices as derived for the trade sector	Base year estimate is moved with the Index of gross trading income of commodity producing sectors at constant prices as derived for the trade sector
<b>10. Railways</b> (1) railways	Annual railway budget for compensation of employees and operating surplus Railway Board for data on passenger and goods traffic	Estimated through income method (sum of compensation of employees, operating surplus and consumption of fixed capital) <b>Supplied by CSO</b>	Base year estimate moved with combined indicator of passenger kilometers and net tonne kilometers, combined with their earnings in the base year as weights <b>Supplied by CSO</b>
<b>11. Other Transport</b> (1) <b>Public (i)</b> Mechanized road transport	Budget documents for DCUs for value of output and inputs Annual reports of the NDCUs for value of output and inputs	Both value of output and value of material inputs are available	Base year estimate is moved with the quantum index of passenger kilometers
(1) <b>Public (ii)</b> water transport	Budget documents for DCUs for value of output and inputs Annual reports of the NDCUs for value of output and inputs	Both value of output and value of material inputs are available	Base year estimate of GVA is moved with the index of volume of cargo handled

Item	Source of data	Assumption / method of estimation	
		At Current Prices	At Constant (2004-05) Prices
(1) <b>Public</b> (ii) air transport	Budget documents for DCUs Annual reports of the NDCUs	Both value of output and value of material inputs are available	Base year estimate is moved with the air transport volume index
(2) <b>Private organized</b> (i) Water transport	Annual reports of companies for value of output and inputs	Constant Price estimates are inflated with WPI.	Base year estimate of GVA (WF*VAPW) is moved with the growth in cargo handled at ports.
(2) <b>Private organized</b> (ii) Air transport	Annual reports of companies	Constant price estimates are inflated with WPI.	Base year = WF*GVAPW separately for rural and urban and corporate sector. Subsequently the aggregate GVA estimates are moved through using growth in commercial vehicles.
(2) <b>Private organized</b> (ii) Mechanized Road Transport	Enterprise survey, NSS 63rd round 2006-07 for VAPW EUS, NSS 61st round 2004-05/ Population Census 2001 for WF estimates "Motor Transport Statistics of India" M/o Shipping, Road Transport & Highways for category wise number of registered vehicles WPI	Constant price estimates are inflated with WPI.	Base year = WF*GVAPW separately for rural and urban and corporate sector. Subsequently the aggregate GVA estimates are moved through using growth in commercial vehicles.

Item	Source of data	Assumption / method of estimation	
		At Current Prices	At Constant (2004-05) Prices
(2) <b>Private organized</b> (iii) Non-Mechanized Road Transport	Enterprise survey, NSS 63rd round 2006-07 for VAPW EUS, NSS 61st round 2004-05/ Population Census 2001 for WF estimates "Motor Transport Statistics of India" M/o Shipping, Road Transport & Highways for category wise number of registered vehicles WPI RBI sales growth of sample companies relating to transport & storage sector.	Base year = WF*GVAPW separately for rural and urban and corporate sector. Subsequently the aggregate GVA estimates are moved through using growth in sales relating to transport and storage sector.	Current prices deflated with WPI
(3) <b>Private unorganized</b> (i) Mechanized road transport	Enterprise survey, NSS 63rd round 2006-07 for VAPW EUS, NSS 61st round 2004-05/ Population Census 2001 for WF estimates "Motor Transport Statistics of India" M/o Shipping, Road Transport & Highways for category wise number of registered vehicles WPI	Constant price estimates are inflated with WPI.	Base year GVA = (WF * VAPW) is moved with the index of number of registered vehicles

Item	Source of data	Assumption / method of estimation	
		At Current Prices	At Constant (2004-05) Prices
(3) <b>Private unorganized</b> (ii) Non-mechanized road transport	Enterprise survey, NSS 63rd round 2006-07 for VAPW EUS, NSS 61st round 2004-05/ Population Census 2001 for WF estimates CPI (IW) & AL	Base year = WF*VAPW For the years, WF is projected using inter survey growth rate and VAPW is projected with the index of CPI(AL) and CPI (IW) respectively, for rural and urban areas.	Constant price estimates are inflated with CPI(IW) & AL.
(3) <b>Private unorganized</b> (iii) Water transport -unorganized	Enterprise survey, NSS 63rd round 2006-07 for VAPW EUS, NSS 61st round 2004-05/ Population Census 2001 for WF estimates EA for WPI	Constant price estimates are inflated with WPI.	Base year estimate of GVA = (WF *VAPW) is moved with the growth in cargo handled at ports.
(4) <b>Services incidental to transport</b> (i) Organized public	Light houses and light ships part of the Budget documents for value of output and inputs Annual reports of companies engaged in services incidental to water and air transport like Port trusts, Inland Water Authority, Dredging Corporation and Airport Authority of India Labour Bureau for CPI- IW	Both value of output and value of material inputs are available	Current price estimates of GVA are deflated by CPI- IW

Item	Source of data	Assumption / method of estimation	
		At Current Prices	At Constant (2004-05) Prices
(4) <b>Services incidental to transport</b> (ii) Private corporate (iii) unorganized	Enterprise survey, NSS 63rd round 2006-07 for VAPW EUS, NSS 61st round 200405/ Population Census 2001 for WF estimates Labour Bureau for CPI-IW	Private corporate and unorganized. Base year estimate of GVA = GVAPW*WF & VAPW estimated separately for private corporate, unorganized and rural & urban is moved with the inter survey growth of WF. For subsequent movement, the combined growth in GVA at current prices of air, water and road transport is used to move this estimate forward.	Private corporate and unorganized. Base year estimate = GVA = GVAPW*WF For subsequent movement, the combined growth in GVA at current prices of air, water and road transport is used to move this estimate forward.
<b>12. Storage and Warehousing</b>			
(1) Storage & Warehousing -Public	Central and state warehousing corporations/Annual Reports for value of output and inputs	Both value of output and value of material inputs are available	Current price estimates are deflated by storage Index.
(2) Storage & Warehousing – Private organized Unorganized	Employment and Unemployment survey data from NSS 61st round and population census, 2001 estimates of work force. Value added per worker from Enterprise Survey, 63rd round Annual Survey of Industries.	Private corporate Constant Price estimates are inflated by WPI. Unorganized. Base year estimate of GVA = GVAPW*WF. WF estimated separately for private corporate, unorganized and rural & urban is moved with the inter survey growth of WF. VAPW is moved forward using CPI AL & IW.	Private corporate Base year estimate of GVA (WF*VAPW) is moved using the ASI based Storage Index.  Unorganized. Deflated by CPI AL and IW.
<b>13. Communication</b>			
(1) Communication – public	Demands for Grants relating to posts and telecommunication	Estimated through income method (sum of compensation of employees, operating surplus and consumption of fixed capital) <b>Supplied by CSO</b>	Base year estimate moved with a combined weighted index of number of money orders, number of telegrams, number of telephones and number of postal articles, with respective earnings in the base year as weights. <b>Supplied by CSO</b>

Item	Source of data	Assumption / method of estimation	
		At Current Prices	At Constant (2004-05) Prices
(2) private communication services- corporate Courier services Cable operators Other communication	Employment and Unemployment survey data from NSS 61st round and population census, 2001 estimates of work force,  Value added per worker from Enterprise Survey, 63rd round  CPI (AL) and CPI (IW) No. of Cellular subscribers RBI sales growth in communication of sample companies.  Average revenue per user (ARPU) per month, number of subscribers and GVA to GVO ratio of sample cellular private companies in 2004-05.	Base year estimate = $WF * VAPW$ in respect of rural and urban for Courier and cable operators. Projected for other years using the RBI Sales Growth in respect of sample companies of communication sector.  For the other private communication sector, using the ARPU, no. of subscribers and the ratio of GVA to total sales, GVA of the sector is determined for the base year which is moved forward using RBI sales growth in communication sector of sample companies. <b>Supplied by CSO</b>	The constant price estimates for rural and urban are obtained by deflating current price estimates with WPI respectively for cable and courier sectors.  In respect of other private communication, the constant price is obtained using growth in number of subscribers. <b>Supplied by CSO</b>
(3) private communication services- unorganized. Courier services Cable operators Other communication	Employment and Unemployment survey data from NSS 61st round and population census, 2001 estimates of work force,  Value added per worker from Enterprise Survey, 63rd round  CPI (AL) and CPI (IW) No. of Cellular subscribers	For Courier and cable operators. Base year estimate = $WF * VAPW$ For other years, WF is projected using inter survey growth rate and VAPW is projected with the index of CPI (AL) and CPI (IW) respectively, for rural and urban areas. Other private communication sector Base year estimate = $WF * VAPW$ . Subsequent years estimates are obtained using the implicit deflator of corporate sector.	For Courier and cable operators. Current price estimates deflated using CPI(AL) and CPI(IW) respectively, for rural and urban areas. In respect of Other private communication. The constant price estimates are obtained by moving the base year estimate using growth in number of subscribers.

Item	Source of data	Assumption / method of estimation	
		At Current Prices	At Constant (2004-05) Prices
<b>14. Real estate, ownership of dwellings, business services</b>			
(1) Real estate Private Organized. Un-organized sector.	Employment and unemployment survey data from NSS 61st round and population census, 2001 estimates of work force. Value added per worker from Enterprise Survey, 63rd round, CPI (AL) and CPI (IW) RBI results on sample group of companies relating to real estate.	Private organised Base year estimate = $WF * VAPW$ .  For the other years, move forward using growth in RBI sample. Private Unorganised. Base year estimate = $WF * VAPW$  For other years, WF is projected using inter-survey growth rate and VAPW is projected with the index of CPI(AL) and CPI(IW) respectively, for rural and urban areas.	Private organised Constant price estimates are obtained by deflating current price estimates with WPI. Private Unorganised. Constant price estimates for rural and urban are obtained by deflating current price estimates with CPI(AL) and CPI(IW) respectively.
(2) Ownership of dwellings Rural Urban	2001 Census residential houses in urban and rural areas and NSS 61st round results for rent per household separately for rural and urban areas. CPI (AL), CPI (IW) and CPI (UNIME) of house rent sub group	The GVA for the ownership of dwellings is equivalent to gross rental of the residential census houses less the cost of repairs and maintenance. Urban Dwelling Base year estimate = no. of census houses (rural and urban separately) * gross rental For other years, Rent per household moved with the index of house rent (separately for rural and urban areas) and total residential houses with the inter-censal growth rate of dwellings to get the estimates of gross rental Rural Dwelling	Urban Dwelling The constant price estimates are obtained by multiplying the base year rent per household with the projected residential census houses. Rural Dwelling The intermediate consumption, Net consumption of fixed capital, Net operating surplus which are required for the current prices are estimated at constant prices also.

Item	Source of data	Assumption / method of estimation	
		At Current Prices	At Constant (2004-05) Prices
(3) Legal services Private organized Unorganized.	Employment and unemployment survey data from NSS 61st round and population census, 2001 estimates of work force. Value added per worker from Enterprise Survey, 63rd round CPI (AL) and CPI (IW)	In the user cost measure, the net operating surplus imputed using the opportunity cost principle, i.e. the net operating surplus is imputed on the basis of what owner occupiers could have earned on alternative investments. Then, the dwelling costs are added to the imputed net operating surplus to obtain the imputed rent. Thus, the user cost approach consist of estimating each of the expenditure that owner of dwellings would need to take into account in fixing a market rent if they decide to rent their dwellings to other people rather than to live in them themselves. These expenditures at current prices for estimation at factor cost are: intermediate consumption, consumption of fixed capital, Net operating surplus.	Private Organized and Unorganized The constant price estimates for rural and urban are obtained by deflating current price estimates with CPI (AL) and CPI (IW) respectively.

Item	Source of data	Assumption / method of estimation	
		At Current Prices	At Constant (2004-05) Prices
(4) Accounting Private organized Unorganized.	Employment and unemployment survey data from NSS 61st round and population census, 2001 estimates of work force. Value added per worker from Enterprise Survey, 63rd round CPI (AL) and CPI (IW)	Private Organized and Unorganized Base year estimate = $WF * VAPW$ For other years, WF is projected using inter-survey average compound growth rate and VAPW is projected with the index of CPI for Agriculture Labourer and CPI (IW) respectively, for rural and urban areas.	Private Organized and Unorganized The constant price estimates for rural and urban are obtained by deflating current price estimates with CPI (AL) and CPI (IW) respectively.
(5) Renting of Machinery Private organized Unorganized.	Employment and unemployment survey data from NSS 61st round and population census, 2001 estimates of work force. Value added per worker from Enterprise Survey, 63rd round CPI (AL) and CPI (IW)	Private Organized and Unorganized Base year estimate = $WF * VAPW$ For other years, WF is projected using inter-survey average compound growth rate and VAPW is projected with the index of CPI for Agriculture Labourer and CPI (IW) respectively, for rural and urban areas.	Private Organized and Unorganized The constant price estimates for rural and urban are obtained by deflating current price estimates with CPI (AL) and CPI (IW) respectively.
(6) Research & Development Private organized Unorganized.	Employment and unemployment survey data from NSS 61st round and population census, 2001 estimates of work force. Value added per worker from Enterprise Survey, 63rd round CPI (AL) and CPI (IW)	Private Organized and Unorganized Base year estimate = $WF * VAPW$ For other years, WF is projected using inter-survey average compound growth rate and VAPW is projected with the index of CPI for Agriculture Labourer and CPI (IW) respectively, for rural and urban areas.	Private Organized and Unorganized The constant price estimates for rural and urban are obtained by deflating current price estimates with CPI (AL) and CPI (IW) respectively.

Item	Source of data	Assumption / method of estimation	
		At Current Prices	At Constant (2004-05) Prices
(7) Computer related services Private organized Unorganized.	NASSCOM data of output Annual Reports/ accounts of software companies for GVA to GVO ratio. WPI	Private organized GVA to GVO ratio of software companies applied on NASSCOM data of output to get the estimates of GVA for organized activities for each year. Unorganized Sector For others, Base year estimate=WF*VAPW subsequent years: using the NASSCOM growth in GVA.	Current prices deflated by WPI.
<b>15. Banking and Insurance</b>		<b>Supplied by CSO</b>	<b>Supplied by CSO</b>
(1) commercial banks	RBI for group-wise data on earnings and expenses of banks	Direct data	Current price estimates deflated by implicit GDP deflator
(2) banking department of RBI	RBI for data on income and expenditure.	Direct data	Current price estimates deflated by implicit GDP deflator of Commercial Banks.
(3) non-banking financial institutions	Annual reports of Nondepartmental Non-banking financial companies and corporations containing their annual accounts of private financial companies (ICICI and HDFC) RBI Bulletin	Direct data on non-departmental financial companies and corporations, and HDFC For private non-banking financial companies the data on income and expenditure for a set of sample companies published in RBI bulletin is blown up with the total paid up capital of non government non banking financial companies (excluding HDFC) For the unorganized financial sector, the GDP = one third of GDP estimates in the organized sector (Non Banking Financial Companies)	Current price estimates deflated by implicit deflator of commercial banks
(4) post office saving bank (POSB), employees provident fund organization (EPFO) and postal life insurance	Budget Documents	Direct data	Current price estimates deflated with CPI (IW)

Item	Source of data	Assumption / method of estimation	
		At Current Prices	At Constant (2004-05) Prices
(5) co-operative credit societies	NABARD for income and expenditure	Direct data	Base year estimates are moved with the average of index of deflated deposits and index of membership
(6) life insurance	Annual reports of LIC for economic classification	Direct data	Base year estimates are moved with the average of deflated indices of change in life fund and sum assured
(7) non-life insurance	Annual Reports of Insurance Companies for economic classification	Direct data	Base year estimates are moved with the deflated index of change in 'Gross premium less claims', for non-life insurance other than ESIC. For ESIC, the current price estimates are deflated with the WPI.
<b>16. Public administration and defence</b>			
(1) Public administration and defence	Budget documents from state governments, central government and local authorities for details on salaries and wages Labour Bureau for the CPI	Income method (Total earnings of staff + consumption of fixed capital)	Current price estimates deflated by the CPI(IW)
(2) Autonomous Institutions	Annual Financial Accounts of some important Central Autonomous Institutions, DGE&T Census of Central Government Employees for 2004-05.	Gross Value Added is worked out from the total income of the sample autonomous institutions for the base year and subsequent years. These ratios (GVA/total income) are applied on the total income of all the autonomous institutions to obtain GDP for base year and subsequent years at current prices.	Current price estimates deflated by the CPI(IW)
<b>17. Other Services</b>			
(1) Education, medical, etc. (public) Education, Medical, Sanitary, TV & radio	Budget documents for salaries and wages	Income method (Total earnings of staff + consumption of fixed capital)	Current price estimates deflated with CPI (IW)

Item	Source of data	Assumption / method of estimation	
		At Current Prices	At Constant (2004-05) Prices
(2) Coaching centre Private organized Unorganized sector	Employment and unemployment survey data from NSS 61st round and population census, 2001 estimates of work force, Value added per worker from Enterprise Survey, 63rd round CPI (AL) and CPI (IW)	Base year estimate (WF * VAPW) WF is projected inter survey for organized and unorganized separately, for rural & urban VAPW is projected with the index of CPI (AL) and CPI (IW) respectively.	By deflating the current price estimates with CPI (AL) and CPI (IW) respectively.
(3) Education (-) Coaching centre Private organized Unorganized Sector.	Employment and unemployment survey data from NSS 61st round and population census, 2001 estimates of work force. Value added per worker from Enterprise Survey, 63rd round CPI (AL) and CPI (IW) 55th and 61st round on consumption expenditure on education.	Private Organized and Unorganized Base year estimate = WF * VAPW For other years, Base year estimate of GVA is moved forward using the growth in consumer expenditure of educational services (1999-2000 and 2004-05) in real terms.	By deflating the current price estimates with CPI (AL) and CPI (IW) respectively.
(4) Medical & Health Private Organized Private Unorganized.	Employment and unemployment survey data from NSS 61st round and population census, 2001 estimates of work force. Value added per worker from Enterprise Survey, 63rd round CPI (AL) and CPI (IW) Health Accounts (satellite accounts-Min of Health and Family Welfare-200405)	Base year estimate = WF * VAPW separately for rural urban and private organized and unorganized. For other years, GVA moved using the trends of consumer expenditure of Private Medical Services.	By deflating the current price estimates with CPI (AL) and CPI (IW) respectively.

Item	Source of data	Assumption / method of estimation	
		At Current Prices	At Constant (2004-05) Prices
(5) Sewage and refuse disposal Private sector Private Unorganized.	Employment and unemployment survey data from NSS 61st round and population census, 2001 estimates of work force. Value added per worker from Enterprise Survey, 63rd round CPI (AL) and CPI (IW)	Base year estimate = WF * VAPW For other years, WF is projected using Inter Survey Growth rate and VAPW is projected with the index of CPI(AL) and CPI (IW) for rural / urban areas.	By deflating the current price estimates with CPI (AL) and CPI (IW) respectively, for rural and urban areas.
(6) Activity of membership organization	-do	-do	-do
(7) Recreational activities Organized Un-organized	-do	-do	-do
(8) For: Pvt. Organised and Unorganised of the following services. Washing & cleaning Hair dressing	-do	-do	-do
(9) Funeral and NEC	Employment and unemployment survey data from NSS 61st round and population census, 2001 estimates of work force. Value added per worker from Enterprise Survey, 63rd round CPI (AL) and CPI (IW)	Current price estimates by inflating constant prices by CPI AL and IW respectively.	Base year estimate= WF* VAPW Moved GVA forward using projected population growth for rural and urban areas.

Item	Source of data	Assumption / method of estimation	
		At Current Prices	At Constant (2004-05) Prices
(10) Tailoring services Private organized Unorganized sector.	NSSO 56th round data on Value Added per Worker (VAPW) and 56th round NSSO estimates of work force separately for rural and urban areas in the base year Employment and unemployment survey data from NSS 61st round and population census, 2001 estimates of work force.	Base year estimate = $WF * VAPW$ Work force determined separately for corporate and unorganized. For subsequent years, the estimates of workforce have been prepared using the inter-survey average compound growth rate of quinquennial Employment and Unemployment Surveys as observed between 1999-00 and 2004-05 of NSS and VAPW of rural and urban sectors have been projected to subsequent years with the index of CPI (AL) and CPI (IW) respectively.	For organized and unorganized By deflating current price estimates with CPI (AL) and CPI (IW) respectively, for rural and urban areas.
(11) Private Household with employed persons unorganized.	Employment and unemployment survey data from NSS 61st round and population census, 2001 estimates of work force. 61st round consumption expenditure survey.	Base year estimate: GVAPW is an annualized daily earnings of persons employed from the consumption expenditure survey and the WF from the EUS. Subsequently, moved forward, WF using intersurvey growth rate and earnings by CPI IW & AL.	For organized and unorganized By deflating current price estimates with CPI (AL) and CPI (IW) respectively, for rural and urban areas.
(12) international and other extra territorial bodies Private corporate	Employment and unemployment survey data from NSS 61st round and population census, 2001 estimates of work force.	$WF * \text{thrice the VAPW of Public Administration \& Defence for the base year. Moved subsequently by CPI (IW) and growth in WF.}$	By deflating current price estimates with CPI (IW)
